Subject index

Volume 39 (2004)

A^2/O process; Nitrogen removal; Nitrification; Denitrification; Internal recycle **39**, 1615

Aboriginal microflora; Biodegradation; Black oil; Introduction; Bio-preparation **39**, 1671

7-ACA; Immobilization; GL-7-ACA acylase; Epoxide silanization; 3-Glycidoxypropyltrimethoxysilane **39**, 359

Acclimation; Mono-azo dye; *Chlorella vulgaris*; Treatment; Toxicity **39**, 623

Acclimation; Phthalate ester; Activated sludge; Biodegradation; Priority pollutant; Inhibition **39**, 1831

Acclimation; UASB; Granulation; Pentachlorophenol; Granule; Reductive dechlorination **39**, 1249

Acetate hexanoate; Lipase; *Penicillium camembertii*; Purification; Esterification **39**, 1495

Acetic acid fermentation; Immobilization; *Acetobacter aceti*; Siran; Wood chips; Polyurethane foam **39**, 547

Acetic acid; Acidogens; Bioconversion; Mixed culture; Selective maximization; Response surface methodology **39**, 1131

Acetobacter aceti; Immobilization; Acetic acid fermentation; Siran; Wood chips; Polyurethane foam **39**, 547

Acetobacter aceti; Immobilized cells; 2-Phenyl-l-ethanol; Phenylacetic acid; Phenylacetaldehyde; Flavours **39**, 747

Acetone; Biofiltration; Trickle-bed air biofilter; Isopropyl alcohol; Influent carbon loading; Elimination capacity **39**, 415

Acetone; Modeling; Biofiltration; Trickle-bed air biofilter; Isopropyl alcohol; Sensitivity analysis; Performance equation **39**, 1849

***N*-Acetylglucosamine**; *Verticillium lecanii*; Submerged fermentation; Solid state fermentation; Chitin; Chitinases; Shrimp wastes; Entomopathogenic fungi **39**, 665

***N*-Acetyl-β-D-glucosaminidase**; Production; *Fusarium oxysporum*; Solid-state fermentation; Purification **39**, 1599

Acid binding; Competitive binding; RSM plots; Alcohol binding; Esterification behaviour; Lipase; Thermal stability; Plackett–Burman design; Selection of alcohol or acid **39**, 847

Acid dyes; Chitosan; Langmuir; Freundlich; Redlich–Peterson; Adsorption isotherms **39**, 693

Acid phosphatase; Immobilization; Composite beads; Chitosan; Activated clay; Catalytic kinetics; Stability **39**, 1087

Acid prehydrolysis; Corrugated cardboard; Enzymatic hydrolysis; Glucose; Hemicellulosic sugars **39**, 1543

Acidic lipase; *Aspergillus niger* mutants; Submerged fermentation **39**, 2031

Acidification; *Poly(hydroxyalkanoates); Fermentation; VFA* **39**, 295

Acidithiobacillus ferrooxidans; Biooxidation; Ferrous iron; Immobilization; Packed-bed bioreactor; Poly(vinyl alcohol) **39**, 2129

Acidogens; Acetic acid; Bioconversion; Mixed culture; Selective maximization; Response surface methodology **39**, 1131

***Acremonium chrysogenum* ATCC 48272**; Cephalosporin C; Solid state fermentation; Wheat rawa; Optimization **39**, 171

Activated carbon; Benzene; Biofilter; Degradation; Ethylene; Filter media **39**, 447

Activated carbon; Carrier; Zeolite; Activated sludge; Nitrification; C/N ratio; Adsorption capacity **39**, 211

Activated clay; Acid phosphatase; Immobilization; Composite beads; Chitosan; Catalytic kinetics; Stability **39**, 1087

Activated sludge; Boron inhibition; Fed-batch operation; Biological treatment; Glucose **39**, 721

Activated sludge; Carrier; Zeolite; Activated carbon; Nitrification; C/N ratio; Adsorption capacity **39**, 211

Activated sludge; Complexation; Polarography; Extracellular polymers; Heavy metal **39**, 833

Activated sludge; Nitrification; Inhibition; Fluoride; Frost glass **39**, 73

Activated sludge; Phthalate ester; Acclimation; Biodegradation; Priority pollutant; Inhibition **39**, 1831

Activated sludge; Rheology; Digestion; Bingham model **39**, 1793

Activation; Date pits; Kinetic models; Langmuir; Dyes **39**, 193

Activation; Enzymes; Inhibition; Parametric classification; Correction of slope coordinates of activation **39**, 805

Activity; Biotransformation; Fungi; Oxygen uptake rate; Process-monitoring; monitoring; Terpene **39**, 2221

doi:10.1016/S0032-9592(04)00309-7

Acylated amino acids; D-Aminoacylase; Hydrolysis; D-Amino acids; *Trichoderma*; Constitutive enzyme **39**, 1119

***S*-Adenosyl-L-methionine (AdoMet)**; Spent brewer's yeast cell; Biotransformation; L-Methionine; γ-L-Glutamyl-L-cysteinyl-glycine (GSH) **39**, 1993

Adhesive plaque protein; Mytilus; Cloning; Sequencing **39**, 659

Adsorbable organic halogens; Colour; Kraft effluent; Lignin; *Paecilomyces* sp; *Pseudomonas aeruginosa*; Sequential bioreactor **39**, 1693

Adsorbent treatment; Plant cell culture; Paclitaxel; Precipitation; Purification **39**, 1985

Adsorption capacity; Carrier; Zeolite; Activated carbon; Activated sludge; Nitrification; C/N ratio **39**, 211

Adsorption isotherms; Chitosan; Acid dyes; Langmuir; Freundlich; Redlich–Peterson **39**, 693

Adsorption; Ammoniacal-nitrogen; Leachate; Nitrification; Reed bed; Wastewater treatment **39**, 1971

Adsorption; Bromelain; Magnetic; Nanoparticles; Polyacrylic acid **39**, 2207

Adsorption; Chitin; Silver-thiosulphate complexes; Photographic wastewater **39**, 1553

Adsorption; Copper(II); Dehydrated wheat bran (DWB); Isotherm; Thermodynamic parameters **39**, 2183

Adsorption; Cr(VI); Steam exploded wheat straw (SEWS); Fe(III)-modified SEWS; Desorption **39**, 541

Adsorption; Lyocell; Viscose; Cellulose; Cellulase; Kinetics **39**, 257

Adsorption; *Phanerochaete chrysosporium*; Chlorophenols; Desorption; Wastewater **39**, 2025

Adsorption; Pseudo-isotherm; Pseudo-second order; Kinetics; Equilibrium **39**, 759

Aeration; Constructed wetland; Recirculation; Nitrification; Wastewater **39**, 351

Aeration; Microbial fuel cell (MFC); Membrane-less; Mediator-less; Wastewater treatment; Pt-coated graphite felt **39**, 1007

Aeration; Solid-state fermentation; Sugar cane bagasse; *Thermoascus aurantiacus*; Xylanase **39**, 1387

Aerobic granular sludge; SBR; Selective pressure; Microscopic observation; Granulation **39**, 557

Aerobic granule; SBR; Settling time; Selection pressure; Cell polysaccharides; Cell hydrophobicity; Microbial activity **39**, 579

Aerobic; Anaerobic; Bioremediation; Selenium; *Pseudomonas fluorescens* **39**, 1607

Affinity; Amylase; Cellulase; CELBEADS; Composite matrices; Expanded bed chromatography **39**, 565

Airlift bioreactor; Characterisation; Laccase; Phenol Red; Stability; *Trametes versicolor* **39**, 467

Airlift reactor; Neomycin; *Streptomyces marinensis* NUV-5; Continuous fermentation **39**, 1407

Alcohol binding; Competitive binding; RSM plots; Esterification behaviour; Lipase; Acid binding; Thermal stability; Plackett–Burman design; Selection of alcohol or acid **39**, 847

Algal cells; Biosorption; Immobilization; Nickel; Isotherms **39**, 1767

Alginate; Lipase; Production; *Aspergillus niger*; Immobilization; κ-Carrageenan; Polyacrylamide **39**, 525

Alkaline protease production; Calcium alginate; Immobilized cells; Repeated batch fermentation **39**, 1331

Alkaline protease; *Bacillus mojavensis*; Response surface methodology; Bioreactor **39**, 203

Alkaline protease; *Bacillus* sp; Detergent; Plackett–Burman design; FCCCD; Response surface methodology; Repression; Economy **39**, 2115

Alkaline protease; *Bacillus sphaericus*; Kinetic analysis; Fed-batch culture **39**, 1093

Alkaline protease; *Bacillus*; Polychaeta; Soybean meal; Optimization **39**, 1441

Alkaline protease; *Penicillium* sp; Solid substrate fermentation; Soy protein hydrolysis **39**, 977

Alkaline protease; Production; Characterization; Purification; *Nocardiopsis* sp; Proteases **39**, 67

Alkaline protease; Solid state fermentation; *Bacillus* **39**, 1893

Alkalinity; Anaerobic bio-methanization; Granular sludge; Suspended sludge; Kitchen waste; Waste/inoculum ratio **39**, 2019

Alternating current; Field intensity; Fibrin plate; Glomerulo nephritis; Urokinase; Voltage **39**, 1

Ambient temperature; Hydrolysis; Fermentation; Total volatile fatty acids (TVFA); Fixed-bed reactor (FAS); Suspended biomass reactor (FER); Hydraulic retention time (HRT); Nutrient biological removal; Organic volumetric loading rate **39**,

Amino acid composition; Gamma-irradiation; RNase *Th*; UV-spectra **39**, 2257

Amino acid surfactants; Enzymatic synthesis; Lipase; Response surface methodology (RSM); Free fatty acids; L-Lysine **39**, 1511

3-Aminopropionic acid; Catalase; Magnesium silicate; Covalent immobilization; Glutaraldehyde **39**, 2149

Ammonia oxidation; Free ammonia; Nitrification; Nitrite accumulation; Nitrite; Kinetics **39**, 1223

Ammonia; *Dictyostelium discoideum*; Growth kinetics; Cell density; Axenic media; Carbohydrates **39**, 333

Ammoniacal-nitrogen; Adsorption; Leachate; Nitrification; Reed bed; Wastewater treatment **39**, 1971

α-Amylase inactivation; Corn starch hydrolysis; Process variables; Mathematical modelling; Stirred batch bioreactor **39**, 1877

α-Amylase; *Aspergillus*; *Bacillus*; Glucoamylase; Solid state fermentation; Starch hydrolysis; Thermostable **39**, 185

Amylase; Cellulase; CELBEADS; Composite matrices; Affinity; Expanded bed chromatography **39**, 565

α-Amylase; Corn, rice and wheat starch hydrolysis; Inactivation; Temperature; Processing time; Mathematical modelling; Stirred batch bioreactor **39**, 1137

α-Amylase; Production; *Bacillus subtilis*; Starch; Hydrolysis **39**, 1745

Amylase; Soybean; Glucosidase; Glucuronidase; Peroxidase; Phenolic aglycones; Antioxidant; Nutritional functionality **39**, 1785

Amylase; Thermophilic aerobic digestion (TAD); Cellulase; Thermophiles; Waste processing **39**, 1661

Anaerobic bio-methanization; Granular sludge; Suspended sludge; Kitchen waste; Waste/inoculum ratio; Alkalinity **39**, 2019

Anaerobic decolorization; Reactive Brilliant Blue; Co-metabolism; Anthraquinone dye **39**, 89

Anaerobic digestion; Fruit and vegetable waste; Temperature; Energy balance **39**, 2143

Anaerobic digestion; Inhibition; Kinetics; Two-phase olive mill effluents (TPOME); Phenolic compounds **39**, 425

Anaerobic treatment; Olive mill wastewater; OLR; Polyphenol; UASB **39**, 1947

Anaerobic; Aerobic; Bioremediation; Selenium; *Pseudomonas fluorescens* **39**, 1607

Anaerobic; Volatile fatty acids; Hybrid; pH **39**, 1491

Analysis of equations; Inhibition and activation of enzymes; Equations for calculation of initial rates; Examples of calculation of the constants of activation **39**, 815

Angiotensin I converting enzyme inhibitory peptides; Fish scale; Antihypertensive activity; Spontaneously hypertensive rats; Hydrolysate purification **39**, 1195

Angiotensin I converting enzyme; Flavourzyme; Corn gluten; Solubility; Water sorption **39**, 989

Animal cell culture; CHO cell; Glucose; Glutamine **39**, 717

Anoxygenic phototrophic bacteria; Theoretical and experimental quantum yield; *Rhodobacter capsulatus*; Metabolism; Bioenergetic; Photosynthesis; Culture growth; Mathematical model **39**, 939

Anthraquinone dye; Reactive Brilliant Blue; Anaerobic decolorization; Co-metabolism **39**, 89

Antibiotic; *Streptomyces coelicolor*; Response surface methodology; Optimization **39**, 1057

Antibiotic; *Streptomyces*; Continuous process; Morphology; Retamycin **39**, 2249

Anticaries; Cacao bean husk; *Theobroma cacao*; Glucosyltransferase; Polyphenols **39**, 2043

Antifungal activity; Chitinase; *Trichoderma harzianum*; Solid-state fermentation **39**, 1583

Antihypertensive activity; Fish scale; Angiotensin I converting enzyme inhibitory peptides; Spontaneously hypertensive rats; Hydrolysate purification **39**, 1195

Antimicrobial activity; Solid-state bioprocessing; *Listeria monocytogenes*; *Vibrio parahaemolyticus*; *Escherichia coli 0157:H7*; *Rhizopus oligosporus* **39**, 1939

Antimicrobial peptide; Buforin IIb; Chemical cleavage; Expression and purification; Fusion protein **39**, 1731

Antimicrobial peptide; Human β-defensin-2; Soluble protein; Optimization **39**, 2199

Antimicrobial activity; Anti Phennolic aglycone; β-Glucosidase; 1,1-Diphenyl-2-picrylhydrazyl radical (DPPH) inhibition system; β-Carotene oxidation model system **39**, 367

Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX (guaiacol peroxidase); Sports; phytochenucals; peptides; phenolics; antioxidants; Helicobacter phlori **39**, 637

Antioxidant activity; Heat shock; Microwave treatment; L-DOPA; *Vicia faba*; Parkinson's diet **39**, 1775

Antioxidant enzymes; Epicatechin; GSH; Lipid peroxidation; Fasted rats **39**, 1525

Antioxidant enzymes; Fusarium; Maltose; Glucose; Pyruvate; Ascorbat **39**, 1519

Antioxidant response; Environmental applications; Human health; Proline-linked oxidative phosphorylation; Phenolic antioxidants; Phytochemicals; Proline-linked pentose phosphate pathway **39**, 789

Antioxidant; Soybean; Glucosidase; Amylase; Glucuronidase; Peroxidase; Phenolic aglycones; Nutritional functionality **39**, 1785

Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX (guaiacol peroxidase); Sprouts; phytochenucals; peptides; phenolics; antioxidants; antimicrobials; Helicobacter phlori **39**, 637

Antrodia camphorata; Exopolysaccharide; Submerged fermentation; Two-stage pH process; Molecular weight; pH **39**, 931

Applications; Cyclodextrins; Inclusion complex; Equilibrium; Complexation techniques **39**, 1033

Aquatic plants; Biosorption; Heavy metals; Langmuir model; Pseudo second order **39**, 179

Aqueous two-phase systems; Size-exclusion chromatography; Whey proteins; Modeling **39**, 1751

Aqueous two-phase systems; Thermodynamics; Excess Gibbs energy; Biomolecules **39**, 2075

Aroma; Cassava; Liquid waste; Volatile compounds; Geotrichum fragrans **39**, 411

Arsenite; Naphthalene degradation; Plasmid; Soil model system **39**, 1305

***Artemisia annua* L**; Shoot culture; Growth; Artemisinin biosynthesis; Bioreactor; Plant-specific valuable metabolite production **39**, 45

Artemisinin biosynthesis; *Artemisia annua* L; Shoot culture; Growth; Bioreactor; Plant-specific valuable metabolite production **39**, 45

Artificial neural network; Optimization; Extracellular protease; *Pseudomonas* sp; Response surface methodology; Central composite design; Radial basis function **39**, 2193

Ascorbat; Fusarium; Maltose; Glucose; Pyruvate; Antioxidant enzymes **39**, 1519

Aspergillus ficuum; Inulinase; Exoinulinase; Endoinulinase; Native-PAGE; Production; Separation **39**, 5

***Aspergillus niger* mutants**; Acidic lipase; Submerged fermentation **39**, 2031

Aspergillus niger; Immobilization; Glucose; Citric acid; Physiology **39**, 1963

Aspergillus niger; Invertase; Overproduction; Parasexual cycle; Solid fermentation; Water activity; Enzymatic yields **39**, 2085

Aspergillus niger; Kinetics; Carbohydrates utilisation; Citric acid production **39**, 2261

Aspergillus niger; Lipase; Production; Immobilization; Alginate; κ-Carrageenan; Polyacrylamide **39**, 525

Aspergillus niger; Mannanase; Mannan; Copra **39**, 1103

Aspergillus niger; Table olive wastewater; Biological treatment; Phenolic compounds; Fenton's reagent; Hydrogen peroxide **39**, 1653

Aspergillus oryzae; *Aureobasidium pullulans*; Transfructosylation; Fructosyl transferase; Fructo-oligosaccharides **39**, 753

Aspergillus sp; *Fusarium* sp; *Penicillium* sp; *Graphium* sp; Biodegradation; Phenol **39**, 1001

Aspergillus versicolor; β-Xylosidase; Xylobiase; Glycoprotein **39**, 1931

Aspergillus; *Bacillus*; α-Amylase; Glucoamylase; Solid state fermentation; Starch hydrolysis; Thermostable **39**, 185

Aspergillus; Purification; Lipase **39**, 239

Astaxanthin; *Chlorella zofingiensis*; Glucose; Nitrate; Mixotrophic culture **39**, 1761

Aureobasidium pullulans; *Aspergillus oryzae*; Transfructosylation; Fructosyl transferase; Fructo-oligosaccharides **39**, 753

Axenic media; *Dictyostelium discoideum*; Growth kinetics; Cell density; Carbohydrates; Ammonia **39**, 333

Axenic media; *Dictyostelium discoideum*; Synthetic medium; Bioreactor; Batch cultivation; Fed-batch cultivation **39**, 585

Axenic media; *Dictyostelium discoideum*; Synthetic medium; Medium design; Batch cultivation; Shake-flask cultivation **39**, 925

Bacillus mojavensis; Alkaline protease; Response surface methodology; Bioreactor **39**, 203

***Bacillus* sp**; Alkaline protease; Detergent; Plackett–Burman design; FCCCD; Response surface methodology; Repression; Economy **39**, 2115

Bacillus sphaericus; Alkaline protease; Kinetic analysis; Fed-batch culture **39**, 1093

Bacillus stearothermophilus; Thermostable α-galactosidase; Soybeans; Soymilk hydrolysis; Oligo-saccharides; Flatulence **39**, 1723

Bacillus subtilis; α-Amylase; Production; Starch; Hydrolysis **39**, 1745

Bacillus; *Aspergillus*; α-Amylase; Glucoamylase; Solid state fermentation; Starch hydrolysis; Thermostable **39**, 185

Bacillus; Polychaeta; Alkaline protease; Soybean meal; Optimization **39**, 1441

Bacillus; Solid state fermentation; Alkaline protease **39**, 1893

Backwashing; Biofilter; BOD removal; Floating media; Nitrification; Upflow; Volumetric loading **39**, 765

Bacteria; Freeze-concentration; Ice-nucleating activity **39**, 405

Bacterial strains; Biosorption; Cadmium; Chromate; Metal-polluted soils **39**, 909

Batch cultivation; *Dictyostelium discoideum*; Axenic media; Synthetic medium; Bioreactor; Fed-batch cultivation **39**, 585

Batch cultivation; *Dictyostelium discoideum*; Axenic media; Synthetic medium; Medium design; Shake-flask cultivation **39**, 925

Batch cultures; *Geotrichum candidum*; *Penicillium camembertii*; Carbon and nitrogen yields; Metabolites production **39**, 1449

Batch denitrifying reactor; Continuous-flow stirred reactor; Denitrification; Mixed bacterial culture; Nitrite accumulation; Kinetic analysis **39**, 95

Batch processing; Biosorption; Iron; *Streptomyces rimosus*; Waste-water treatment **39**, 1643

Beef tallow; Biomass support particle (BSP); Lipase; Poultry fat; *Rhizomucor miehei*; *Yarrowia lipolytica* **39**, 1347

Beijerinckia; Fermentation; Spray drying; Encapsulation **39**, 1201

Beijerinckia; Fermentation; Spray-drying; Encapsulation **39**, 1275

Benzene; Activated carbon; Biofilter; Degradation; Ethylene; Filter media **39**, 447

Benzene; Biodegradation; Interaction; Phenol; *Pseudomonas putida* F1; Toluene **39**, 983

Benzene; Toluene; Phenol; Biodegradation; Substrate interaction; *Pseudomonas putida* F1 **39**, 27

Beta vulgaris; Hairy roots; Bubble column reactor; Polyamines; Methyl jasmonate; Pigment release; CTAB **39**, 2091

Bingham model; Rheology; Activated sludge; Digestion **39**, 1793

Bioaccumulation; Cd (II); Pb (II); Cu (II); Viable *R. arrhizus* **39**, 105

Bioaugmentation; Phthalic acid esters; Biodegradation; Kinetics; Priority pollutant; Bioremediation **39**, 1837

Biochemical oxygen demand (BOD); Chitosan; Whey; Lactose; Demineralization **39**, 381

Bioconversion; Acetic acid; Acidogens; Mixed culture; Selective maximization; Response surface methodology **39**, 1131

Biodegradation; Benzene; Interaction; Phenol; *Pseudomonas putida* F1; Toluene **39**, 983

Biodegradation; Benzene; Toluene; Phenol; Substrate interaction; *Pseudomonas putida* F1 **39**, 27

Biodegradation; Black oil; Aboriginal microflora; Introduction; Biopreparation **39**, 1671

Biodegradation; *Escherichia coli*; Methylphosphonate; CP lyase **39**, 1063

Biodegradation; *Fusarium* sp; *Aspergillus* sp; *Penicillium* sp; *Graphium* sp; Phenol **39**, 1001

Biodegradation; Phthalate ester; Activated sludge; Acclimation; Priority pollutant; Inhibition **39**, 1831

Biodegradation; Phthalate esters; Microbial; Kinetics; *Pseudomonas fluoresences* FS1 **39**, 1125

Biodegradation; Phthalic acid esters; Kinetics; Priority pollutant; Bioremediation; Bioaugmentation **39**, 1837

Biodegradation; Solid state fermentation; Submerged fermentation; Organic solid waste treatment; Hybrid system **39**, 37

Bioenergetic; Theoretical and experimental quantum yield; *Rhodobacter capsulatus*; Anoxygenic phototrophic bacteria; Metabolism; Photosynthesis; Culture growth; Mathematical model **39**, 939

Bioethanol; Lignocellulosic biomass; Simultaneous saccharification and fermentation; *Kluyveromyces marxianus* **39**, 1843

Biofilter; Activated carbon; Benzene; Degradation; Ethylene; Filter media **39**, 447

Biofilter; Backwashing; BOD removal; Floating media; Nitrification; Upflow; Volumetric loading **39**, 765

Biofiltration; H_2S; *Thiobacillus thioparus*; Peat; Hydrogen sulphide **39**, 165

Biofiltration; Modeling; Trickle-bed air biofilter; Isopropyl alcohol; Acetone; Sensitivity analysis; Performance equation **39**, 1849

Biofiltration; Trickle-bed air biofilter; Isopropyl alcohol; Acetone; Influent carbon loading; Elimination capacity **39**, 415

Biological nitrogen removal process; High-strength ammonium industrial wastewater; Influent COD/N ratio; Nitrification rate **39**, 2035

Biological nitrogen removal; Bioreactor; Immobilization; Carbon source recycling **39**, 1269

Biological nutrient removal; Specific organic loading rate; Sequencing batch reactor **39**, 507, 513

Biological sludge; Conditioning; Dewatering; Fenton **39**, 1503

Biological treatment; Boron inhibition; Fed-batch operation; Glucose; Activated sludge **39**, 721

Biological treatment; MBR; Ultrasound; Excess sludge; Phosphorus removal **39**, 1923

Biological treatment; Table olive wastewater; *Aspergillus niger*; Phenolic compounds; Fenton's reagent; Hydrogen peroxide **39**, 1653

Bioluminescence; Naphthalene; On-line detection; *Ps. fluorescens* HK44 **39**, 1217

Biomass support particle (BSP); Beef tallow; Lipase; Poultry fat; *Rhizomucor miehei*; *Yarrowia lipolytica* **39**, 1347

Biomass viability; Submerged membrane bioreactor; Whey treatment; Non-biodegradable compounds **39**, 1631

Biomass; Xanthan gum; Molasses; *X. campestris*; Fermentation **39**, 249

Biomolecules; Thermodynamics; Aqueous two-phase systems; Excess Gibbs energy **39**, 2075

Biooxidation; Ferrous iron; Immobilization; Packed-bed bioreactor; Poly(vinyl alcohol); *Acidithiobacillus ferrooxidans* **39**, 2129

Biopreparation; Biodegradation; Black oil; Aboriginal microflora; Introduction **39**, 1671

Bioprocess; Bioreactors; Fed-batch culture; Fermentation; Ergosterol; *Saccharomyces cererisiae* **39**, 345

Bioreactor comparison; Fermentative bioconversion; Mixed microbial culture; Horizontal rotating tubular bioreactor (HRTB); Bioreactor potential use **39**, 995

Bioreactor potential use; Fermentative bioconversion; Mixed microbial culture; Horizontal rotating tubular bioreactor (HRTB); Bioreactor comparison **39**, 995

Bioreactor; *Artemisia annua* L; Shoot culture; Growth; Artemisinin biosynthesis; Plant-specific valuable metabolite production **39**, 45

Bioreactor; *Bacillus mojavensis*; Alkaline protease; Response surface methodology **39**, 203

Bioreactor; Biological nitrogen removal; Immobilization; Carbon source recycling **39**, 1269

Bioreactor; *Candida guilliermondii*; Rice straw hydrolysate; Detoxification **39**, 1433

Bioreactor; *Dictyostelium discoideum*; Axenic media; Synthetic medium; Batch cultivation; Fed-batch cultivation **39**, 585

Bioreactor; Municipal solid waste; Leachate recirculation; Leachate recirculation rate **39**, 2157

Bioreactors; Bioprocess; Fed-batch culture; Fermentation; Ergosterol; *Saccharomyces cererisiae* **39**, 345

Bioremediation; Anaerobic; Aerobic; Selenium; *Pseudomonas fluorescens* **39**, 1607

Biosorption; Aquatic plants; Heavy metals; Langmuir model; Pseudo second order **39**, 179

Biosorption; Cadmium; Chromate; Bacterial strains; Metal-polluted soils **39**, 909

Biosorption; Immobilization; Algal cells; Nickel; Isotherms **39**, 1767

Biosorption; Iron; *Streptomyces rimosus*; Waste-water treatment; Batch processing **39**, 1643

Biosorption; Phenol; Immobilized activated sludge; Packed bed column; Breakthrough curve **39**, 599

Biosurfactant; *Serratia*; Gasoline; Experimental design **39**, 2277

Biotransformation; Activity; Fungi; Oxygen uptake rate; Process-monitoring; monitoring; Terpene **39**, 2221

Biotransformation; Carnitine; Resting cells; Reuse cells; *Escherichia coli* **39**, 287

Biotransformation; Microbial screening; Peroxidase; Oxidation; Isosafrol; Piperonal **39**, 2269

Biotransformation; Spent brewer's yeast cell; *S*-Adenosyl-L-methionine (AdoMet); L-Methionine; γ-L-Glutamyl-L-cysteinyl-glycine (GSH) **39**, 1993

Black oil; Biodegradation; Aboriginal microflora; Introduction; Biopreparation **39**, 1671

Blood compatibility; Surface modification; Radiation grafting; *O*-butyrylchitosan; Poly(vinyl chloride); Platelet adhesion **39**, 1151

BOD removal; Backwashing; Biofilter; Floating media; Nitrification; Upflow; Volumetric loading **39**, 765

Boron inhibition; Fed-batch operation; Biological treatment; Glucose; Activated sludge **39**, 721

Breakthrough curve; Biosorption; Phenol; Immobilized activated sludge; Packed bed column **39**, 599

Brewing; Malt; Milling; Mashing; Starch hydrolysis; Wort **39**, 2213

Bromelain; Adsorption; Magnetic; Nanoparticles; Polyacrylic acid **39**, 2207

Bubble column reactor; *Beta vulgaris*; Hairy roots; Polyamines; Methyl jasmonate; Pigment release; CTAB **39**, 2091

Buforin IIb; Antimicrobial peptide; Chemical cleavage; Expression and purification; Fusion protein **39**, 1731

Butyrylcholinesterase; Purification; Parathion; Paraoxon; Stabilization **39**, 877

C/N ratio; Carrier; Zeolite; Activated carbon; Activated sludge; Nitrification; Adsorption capacity **39**, 211

Ca-alginate beads; Xylitol; Sugarcane bagasse hydrolysate; Immobilized cells; Stirred tank reactor **39**, 2135

Cacao bean husk; *Theobroma cacao*; Glucosyltransferase; Anticaries; Polyphenols **39**, 2043

Cadmium; Biosorption; Chromate; Bacterial strains; Metal-polluted soils **39**, 909

Calcium alginate; Alkaline protease production; Immobilized cells; Repeated batch fermentation **39**, 1331

Calcium hardness; UASB; Granular sludge; CO_2-stripper **39**, 1393

***Calothrix* sp**; Cyanobacteria; Lysozyme; Phycocyanin; Extraction; Purification **39**, 2047

Candida guilliermondii; Eucalyptus hydrolysate; Treatment; Fermentation and xylitol production **39**, 1909

Candida guilliermondii; Rice straw hydrolysate; Detoxification; Bioreactor **39**, 1433

Candida krusei; Oxygen limitation; Glycerol fermentation; Cytosolic glycerol-3-phosphate dehydrogenase (ctGPD); Glycerol-3-phosphatase (GPP); Mitochondrial glycerol-3-phosphate dehydrogenase (mtGPD) **39**, 1899

Candida krusei; Repeated batch fermentation; Glycerol; Glycerol production kinetics **39**, 1507

Candida rugosa; Immobilized lipase; Cuprophane hollow fibre; Palm oil hydrolysis; Membrane reactor; Reactor operating regime **39**, 1377

Candida rugosa; Lipase; Enzyme activity; Hydrolytic reaction; Organic–aqueous two-phase; Surfactant **39**, 233

***Candida* sp**; Lipase; Fermentation; Mutation **39**, 459

***Candida* sp**; Optimization; Taguchi method; Xylitol production **39**, 951

Carbohydrates utilisation; Kinetics; Citric acid production; *Aspergillus niger* **39**, 2261

Carbohydrates; *Dictyostelium discoideum*; Growth kinetics; Cell density; Axenic media; Ammonia **39**, 333

Carbon and nitrogen yields; *Geotrichum candidum*; *Penicillium camembertii*; Batch cultures; Metabolites production **39**, 1449

Carbon source recycling; Biological nitrogen removal; Bioreactor; Immobilization **39**, 1269

Carbon source; Lipase; Enzyme production; Surfactants; Fatty acids; Triglycerides **39**, 2109

Carboxymethyl cellulase; Cellulase; Endoglucanase; *Mucor circinelloides*; Cellulose; Carboxymethyl cellulose **39**, 1871

Carboxymethyl cellulose; Cellulase; Endoglucanase; *Mucor circinelloides*; Cellulose; Carboxymethyl cellulase **39**, 1871

Carboxypeptidase; Pancreas; Sucrose; Stabilisation; Proteases **39**, 615

Carboxypeptidase; Sorghum; Steeping; Germination; Moisture; Proteinase **39**, 711

Carnitine; Resting cells; Biotransformation; Reuse cells; *Escherichia coli* **39**, 287

β-Carotene oxidation model system; Cranberry pomace; Ellagic acid; *Lentinus edodes*; Phenolics; Phennolic aglycone; Antioxidant activity; β-Glucosidase; 1,1-Diphenyl-2-picrylhydrazyl radical (DPPH) inhibition system **39**, 367

κ-Carrageenan; Lipase; Production; *Aspergillus niger*; Immobilization; Alginate; Polyacrylamide **39**, 525

Carrier; Zeolite; Activated carbon; Activated sludge; Nitrification; C/N ratio; Adsorption capacity **39**, 211

Cassava; Aroma; Liquid waste; Volatile compounds; Geotrichum fragrans **39**, 411

Catalase; Magnesium silicate; Covalent immobilization; Glutaraldehyde; 3-Aminopropionic acid **39**, 2149

Catalytic kinetics; Acid phosphatase; Immobilization; Composite beads; Chitosan; Activated clay; Stability **39**, 1087

Cd (II); Bioaccumulation; Pb (II); Cu (II); Viable *R. arrhizus* **39**, 105

Cd(II), Cu(II), Pb(II) and Zn(II) ions; Vermicompost; Heavy metals; Effluent treatment **39**, 81

CELBEADS; Amylase; Cellulase; Composite matrices; Affinity; Expanded bed chromatography **39**, 565

Cell apoptosis; Cell cycle; Osmotic pressure; Recombinant BHK cell; Cell culture **39**, 1817

Cell culture; Cell apoptosis; Cell cycle; Osmotic pressure; Recombinant BHK cell **39**, 1817

Cell cycle; Cell apoptosis; Osmotic pressure; Recombinant BHK cell; Cell culture **39**, 1817

Cell density; *Dictyostelium discoideum*; Growth kinetics; Axenic media; Carbohydrates; Ammonia **39**, 333

Cell hydrophobicity; Aerobic granule; SBR; Settling time; Selection pressure; Cell polysaccharides; Microbial activity **39**, 579

Cell polysaccharides; Aerobic granule; SBR; Settling time; Selection pressure; Cell hydrophobicity; Microbial activity **39**, 579

Cellobiase; Immobilized spores; Cellobiose; Cellulase; Corncob; Hydrolysis **39**, 1363

Cellobiose; Immobilized spores; Cellobiase; Cellulase; Corncob; Hydrolysis **39**, 1363

Cellulase production; Solid-state culture; Pressure oscillation coupled with forced aeration; *Penicillium decumbens* **39**, 1293

Cellulase; Amylase; CELBEADS; Composite matrices; Affinity; Expanded bed chromatography **39**, 565

Cellulase; Endoglucanase; *Mucor circinelloides*; Cellulose; Carboxymethyl cellulose; Carboxymethyl cellulase **39**, 1871

Cellulase; Immobilized spores; Cellobiase; Cellobiose; Corncob; Hydrolysis **39**, 1363

Cellulase; Lyocell; Viscose; Cellulose; Kinetics; Adsorption **39**, 257

Cellulase; pH; Xylanase; Lactose; *Trichoderma reesei*; Filamentous fungi **39**, 729

Cellulase; Thermophilic aerobic digestion (TAD); Amylase; Thermophiles; Waste processing **39**, 1661

Cellulose; Cellulase; Endoglucanase; *Mucor circinelloides*; Carboxymethyl cellulose; Carboxymethyl cellulase **39**, 1871

Cellulose; Lyocell; Viscose; Cellulase; Kinetics; Adsorption **39**, 257

Central composite design; Dextran dextrinase; *Gluconobacter oxydans*; Medium optimization **39**, 1299

Central composite design; Optimization; Extracellular protease; *Pseudomonas* sp; Response surface methodology; Artificial neural network; Radial basis function **39**, 2193

Central composite design; Response surface methodology; Sulphuric acid; *Thiobacillus thiooxidans* **39**, 1953

Central composite rotatable design (CCRD); Enzymic synthesis; Esterification; Isoamyl butyrate, *Rhizopus* sp. lipase; *Geotrichum* sp. lipase; Response surface methodology (RSM) **39**, 687

Central composite rotatable design; Polyhydroxyalkanoate; *Rhizobium meliloti*; Response surface methodology; Mutant; Nutrient limitation **39**, 1977

Cephalexin; Penicillin acylase; β-Lactam antibiotics; Enzymatic synthesis; Organic cosolvent **39**, 111

Cephalosporin C; *Acremonium chrysogenum* ATCC 48272; Solid state fermentation; Wheat rawa; Optimization **39**, 171

Ceramic carrier; *Dictyostelium discoideum*; Mass cultivation; Synthetic medium; Immobilization; Pumice **39**, 1859

Characterisation; Airlift bioreactor; Laccase; Phenol Red; Stability; *Trametes versicolor* **39**, 467

Characteristic time constant; Recombinant yeast; *Saccharomyces cerevisiae*; Starch bioconversion; Compartment model **39**, 1237

Characterization; Alkaline protease; Production; Purification; *Nocardiopsis* sp; Proteases **39**, 67

Characterization; Solid state fermentation; Immobilized *Phanerochaete chrysosporium*; MnP; Purification **39**, 2061

Cheese whey; Jet loop reactor; Membrane filtration; Membrane bioreactor **39**, 2283

Chemical cleavage; Antimicrobial peptide; Buforin IIb; Expression and purification; Fusion protein **39**, 1731

Chickpea flour; Mesophilic anaerobic digestion; Fluidised-bed reactor; Wastewater; Protein isolates **39**, 1913

Chitin; Adsorption; Silver-thiosulphate complexes; Photographic wastewater **39**, 1553

Chitin; *Verticillium lecanii*; Submerged fermentation; Solid state fermentation; Chitinases; *N*-Acetylglucosamine; Shrimp wastes; Entomopathogenic fungi **39**, 665

Chitinase; *Trichoderma harzianum*; Solid-state fermentation; Antifungal activity **39**, 1583

Chitinases; *Verticillium lecanii*; Submerged fermentation; Solid state fermentation; Chitin; *N*-Acetylglucosamine; Shrimp wastes; Entomopathogenic fungi **39**, 665

Chitosan; Acid dyes; Langmuir; Freundlich; Redlich–Peterson; Adsorption isotherms **39**, 693

Chitosan; Acid phosphatase; Immobilization; Composite beads; Activated clay; Catalytic kinetics; Stability **39**, 1087

Chitosan; Fruit juice; Clarification; Sensory evaluation **39**, 2229

Chitosan; Fungal mycelia; Solid substrate fermentation; Sweet potato; Urea **39**, 1639

Chitosan; Immobilisation; Elicitation; Pectin; Stress metabolism; *Cruciata glabra*; *Vitis vinifera* **39**, 1369

Chitosan; Whey; Lactose; Biochemical oxygen demand (BOD); Demineralization **39**, 381

Chlamydomonas reinhardtii; Mutant *CW-15* without a cell wall; Transformation; Gene *hpt* – hygromycin phosphotransferase; Electroporation **39**, 1685

Chlorella vulgaris; Mono-azo dye; Treatment; Toxicity; Acclimation **39**, 623

Chlorella zofingiensis; Astaxanthin; Glucose; Nitrate; Mixotrophic culture **39**, 1761

Chlorination; Electrochemical; Free radical; Ozonation; Scanning electron microscopy (SEM); Wastewater disinfection **39**, 1421

Chlorophenols; *Phanerochaete chrysosporium*; Adsorption; Desorption; Wastewater **39**, 2025

CHO cell; Animal cell culture; Glucose; Glutamine **39**, 717

Chromate; Biosorption; Cadmium; Bacterial strains; Metal-polluted soils **39**, 909

Chromium; *Saccharomyces cerevisiae*; protein; heavy metal; RNA/DNA ratio **39**, 1231

Chromoblastomycosis; *Fonsecaea pedrosoi*; Melanin; Nitrogen source; Tricyclazole; Fungal mass **39**, 633

α-Chymotrypsin; Cyclodextrin; Modified enzyme; Enzyme thermostability; Supramolecular interaction **39**, 535

Cinnamic carbohydrate esters; Horseradish peroxidase; Immobilization; Enzyme kinetics; Peroxidase inactivation; Peroxidase stability **39**, 1455

***Citeromyces* sp**; Decolorization; Molasses wastewater; Melanoidin; Yeast **39**, 917

Citric acid production; Kinetics; Carbohydrates utilisation; *Aspergillus niger* **39**, 2261

Citric acid; Immobilization; Glucose; *Aspergillus niger*; Physiology **39**, 1963

Clarification; Chitosan; Fruit juice; Sensory evaluation **39**, 2229

Cloning; Mytilus; Adhesive plaque protein; Sequencing **39**, 659

Cloning; Transglutaminase; Expression; *Streptoverticillium ladakanum*; *Streptomyces lividans* **39**, 591

Clostridium thermosulfurogenes; Response surface methodology; Solid-state fermentation; *Thermostable* β-*amylase* **39**, 267

Cold shock proteins; *Lactococcus lactis* ssp. *diacetylactis*; Cold shock response; Stationary phase **39**, 2233

Cold shock response; *Lactococcus lactis* ssp. *diacetylactis*; Cold shock proteins; Stationary phase **39**, 2233

Colour; Adsorbable organic halogens; Kraft effluent; Lignin; *Paecilomyces* sp; *Pseudomonas aeruginosa*; Sequential bioreactor **39**, 1693

Co-metabolism; Reactive Brilliant Blue; Anaerobic decolorization; Anthraquinone dye **39**, 89

Community structure; Thermophilic composting; Manure; Quinone profile; Microbial succession; Physico-chemical properties **39**, 1999

Compartment model; Recombinant yeast; *Saccharomyces cerevisiae*; Starch bioconversion; Characteristic time constant **39**, 1237

Compartment; *Escherichia coli*; Structured modeling; *Taq I*; Induced expression; T7 phage promoter **39**, 315

Competitive binding; RSM plots; Alcohol binding; Esterification behaviour; Lipase; Acid binding; Thermal stability; Plackett–Burman design; Selection of alcohol or acid **39**, 847

Complexation techniques; Cyclodextrins; Applications; Inclusion complex; Equilibrium **39**, 1033

Complexation; Activated sludge; Polarography; Extracellular polymers; Heavy metal **39**, 833

Composite beads; Acid phosphatase; Immobilization; Chitosan; Activated clay; Catalytic kinetics; Stability **39**, 1087

Composite matrices; Amylase; Cellulase; CELBEADS; Affinity; Expanded bed chromatography **39**, 565

Composting rate; Food waste composting; Fed-batch operation; Moisture content; Water extractable TOC **39**, 1183

Condensation; Lipase; Erythritol; Lauric acid; Oleic acid; Packed-bed reactor **39**, 681

Conditioning; Biological sludge; Dewatering; Fenton **39**, 1503

Constitutive enzyme; D-Aminoacylase; Hydrolysis; Acylated amino acids; D-Amino acids; *Trichoderma* **39**, 1119

Constructed wetland; Recirculation; Aeration; Nitrification; Wastewater **39**, 351

Continuous feeding; PHAs; *Ralstonia eutropha*; Mixed organic acids **39**, 387

Continuous fermentation; Neomycin; *Streptomyces marinensis* NUV-5; Airlift reactor **39**, 1407

Continuous fermentation; Wine; Quince; Immobilized cells; Yeast **39**, 143

Continuous process; *Streptomyces*; Morphology; Antibiotic; Retamycin **39**, 2249

Continuous-flow stirred reactor; Batch denitrifying reactor; Denitrification; Mixed bacterial culture; Nitrite accumulation; Kinetic analysis **39**, 95

Copper(II); Adsorption; Dehydrated wheat bran (DWB); Isotherm; Thermodynamic parameters **39**, 2183

Copra; Mannanase; Mannan; *Aspergillus niger* **39**, 1103

Cordyceps pruinosa; Polysaccharide; Submerged culture; Orthogonal layout **39**, 2241

Corn gluten; Angiotensin I converting enzyme; Flavourzyme; Solubility; Water sorption **39**, 989

Corn starch hydrolysis; α-Amylase inactivation; Process variables; Mathematical modelling; Stirred batch bioreactor **39**, 1877

Corn, rice and wheat starch hydrolysis; α-Amylase; Inactivation; Temperature; Processing time; Mathematical modelling; Stirred batch bioreactor **39**, 1137

Corncob; Immobilized spores; Cellobiase; Cellobiose; Cellulase; Hydrolysis **39**, 1363

Correction of slope coordinates of activation; Enzymes; Inhibition; Activation; Parametric classification **39**, 805

Corrugated cardboard; Acid prehydrolysis; Enzymatic hydrolysis; Glucose; Hemicellulosic sugars **39**, 1543

CO_2-stripper; UASB; Calcium hardness; Granular sludge **39**, 1393

Covalent immobilization; Catalase; Magnesium silicate; Glutaraldehyde; 3-Aminopropionic acid **39**, 2149

CP lyase; *Escherichia coli*; Methylphosphonate; Biodegradation **39**, 1063

Cr(VI); Adsorption; Steam exploded wheat straw (SEWS); Fe(III)-modified SEWS; Desorption **39**, 541

Cranberry pomace; Ellagic acid; *Lentinus edodes*; Phenolics; Phennolic aglycone; Antioxidant activity; β-Glucosidase; 1,1-Diphenyl-2-picrylhydrazyl radical (DPPH) inhibition system; β-Carotene oxidation model system **39**, 367

Critical flux; Membrane bioreactor; Membrane filtration; Wastewater treatment; Membrane fouling; Hydrodynamics **39**, 157

Cruciata glabra; Immobilisation; Elicitation; Chitosan; Pectin; Stress metabolism; *Vitis vinifera* **39**, 1369

CSTR; Sucrose; Hydrolysis; Invertase; Multiple steady states; Reactor **39**, 2179

CTAB; *Beta vulgaris*; Hairy roots; Bubble column reactor; Polyamines; Methyl jasmonate; Pigment release **39**, 2091

Cu (II); Bioaccumulation; Cd (II); Pb (II); Viable *R. arrhizus* **39**, 105

Cultural conditions; Xylanase; *Pleurotus ostreatus*; SYJ042; Submerge; Properties **39**, 1561

Culture conditions; Polyphosphate; Exopolyphosphatase; Substrate specificity; Phosphate overplus; Cytosol; *Saccharomyces cerevisiae* **39**, 1625

Culture growth; Theoretical and experimental quantum yield; *Rhodobacter capsulatus*; Anoxygenic phototrophic bacteria; Metabolism; Bioenergetic; Photosynthesis; Mathematical model **39**, 939

Cuprophane hollow fibre; *Candida rugosa*; Immobilized lipase; Palm oil hydrolysis; Membrane reactor; Reactor operating regime **39**, 1377

Cyanobacteria; *Calothrix* sp; Lysozyme; Phycocyanin; Extraction; Purification **39**, 2047

Cyclodextrin glucanotransferase; Experimental design **39**, 2053

Cyclodextrin; α-Chymotrypsin; Modified enzyme; Enzyme thermostability; Supramolecular interaction **39**, 535

Cyclodextrins; Applications; Inclusion complex; Equilibrium; Complexation techniques **39**, 1033

Cytosol; Polyphosphate; Exopolyphosphatase; Substrate specificity; Phosphate overplus; Culture conditions; *Saccharomyces cerevisiae* **39**, 1625

Cytosolic glycerol-3-phosphate dehydrogenase (ctGPD); *Candida krusei*; Oxygen limitation; Glycerol fermentation; Glycerol-3-phosphatase (GPP); Mitochondrial glycerol-3-phosphate dehydrogenase (mtGPD) **39**, 1899

Dairy industry wastewater; Membrane separation; Sequencing batch reactor; Membrane bioreactor; Membrane sequencing batch reactor **39**, 221

D-Amino acids; D-Aminoacylase; Hydrolysis; Acylated amino acids; *Trichoderma*; Constitutive enzyme **39**, 1119

D-Aminoacylase; Hydrolysis; Acylated amino acids; D-Amino acids; *Trichoderma*; Constitutive enzyme **39**, 1119

Date pits; Kinetic models; Langmuir; Activation; Dyes **39**, 193

Deactivation; *Trichoderma harzianum*; β-1,3-Glucanase; Stability; Inhibition; Kinetics **39**, 149

Decolorization; Dyestuff; Rotating biological contactor; *Phanerochaete sordida* **39**, 1401

Decolorization; Molasses wastewater; Melanoidin; Yeast; *Citeromyces* sp **39**, 917

Decolorization; White-rot fungi; Laccase; Nutritional factors; Inducers **39**, 1415

Degradation; Activated carbon; Benzene; Biofilter; Ethylene; Filter media **39**, 447

Degradation; Laccase; Phenol Red; Polymerisation; Redox mediator **39**, 1803

Dehydrated wheat bran (DWB); Adsorption; Copper(II); Isotherm; Thermodynamic parameters **39**, 2183

Delignified cellulosic material; Glycerol; Immobilized yeast cells; Wine making; Gluten pellets **39**, 499

Demineralization; Chitosan; Whey; Lactose; Biochemical oxygen demand (BOD) **39**, 381

Denitrification; Batch denitrifying reactor; Continuous-flow stirred reactor; Mixed bacterial culture; Nitrite accumulation; Kinetic analysis **39**, 95

Denitrification; Nitrogen removal; Nitrification; Internal recycle; A^2/O process **39**, 1615

Denitrification; Sulphur; Fluidized bed reactor; Nitrous oxide; Loading rate **39**, 1591

Depolymerisation; Olive oil; Phenolic compounds; *Lactobacillus plantarum* **39**, 841

Desorption; Adsorption; Cr(VI); Steam exploded wheat straw (SEWS); Fe(III)-modified SEWS **39**, 541

Desorption; *Phanerochaete chrysosporium*; Chlorophenols; Adsorption; Wastewater **39**, 2025

Detergent; *Bacillus* sp; Alkaline protease; Plackett–Burman design; FCCCD; Response surface methodology; Repression; Economy **39**, 2115

Detergent-based aqueous two-phase systems; Large-scale extraction; Endoglucanase I; Hydrophobin fusion protein **39**, 889

Detoxification methods; SE-poplar wood; SHF; SSF; Ethanol **39**, 1533

Detoxification; *Candida guilliermondii*; Rice straw hydrolysate; Bioreactor **39**, 1433

Dewatering; Biological sludge; Conditioning; Fenton **39**, 1503

Dextran dextrinase; *Gluconobacter oxydans*; Central composite design; Medium optimization **39**, 1299

Dextranase; Mutan hydrolysis; Mutanase; Synergistic effects; Digestion products; Streptococcal films **39**, 1481

Dictyostelium discoideum; Axenic media; Synthetic medium; Bioreactor; Batch cultivation; Fed-batch cultivation **39**, 585

Dictyostelium discoideum; Axenic media; Synthetic medium; Medium design; Batch cultivation; Shake-flask cultivation **39**, 925

Dictyostelium discoideum; Growth kinetics; Cell density; Axenic media; Carbohydrates; Ammonia **39**, 333

Dictyostelium discoideum; Mass cultivation; Synthetic medium; Immobilization; Pumice; Ceramic carrier **39**, 1859

Dielectric constant; Organic solvent; Permeabilization; Penicillin G acylase; Hydrophobicity; Recombinant; *E.coli* **39**, 301

Differential Evolution; Fermentation; Optimization **39**, 1709

Digestion products; Mutan hydrolysis; Mutanase; Dextranase; Synergistic effects; Streptococcal films **39**, 1481

Digestion; Rheology; Activated sludge; Bingham model **39**, 1793

1,1-Diphenyl-2-picrylhydrazyl radical (DPPH) inhibition system; Cranberry pomace; Ellagic acid; *Lentinus edodes*; Phenolics; Phennolic aglycone; Antioxidant activity; β-Glucosidase; β-Carotene oxidation model system **39**, 367

Disruption; *Kluyveromyces lactis*; Yeast; β-Galactosidase; Immobilization; Gelatin **39**, 703

Dissolved air floatation; Vegetable oil; Residual inert COD; Physicochemical treatment; Oil and grease **39**, 869

Dissolved oxygen; Gluconic acid; Fermentation; Growth; Non-growth conditions **39**, 1341

Distillery wastewater; Sequential (anaerobic/aerobic) treatment; Whisky; UASB **39**, 279

Dose–response curve; *Thiobacillus thiooxidans*; Metal toxicity; Probit model; Sulphur oxidation **39**, 735

D-Xylose; Fermentation; *Pachysolen tannophilus*; Temperature; Ethanol; Xylitol **39**, 673

Dye decolourisation; Laccase; *Pleurotus pulmonarius*; Phenoloxidase; Solid-state fermentation **39**, 855

Dyes; Date pits; Kinetic models; Langmuir; Activation **39**, 193

Dyestuff; Decolorization; Rotating biological contactor; *Phanerochaete sordida* **39**, 1401

E. coli; β-Glucanase; Osmotic stress; Recombinant **39**, 307

E. coli; Recombinant aldolases; Fuc-1-PA; Growth medium; IPTG induction **39**, 1677

E. coli; Organic solvent; Permeabilization; Penicillin G acylase; Dielectric constant; Hydrophobicity; Recombinant **39**, 301

Economy; *Bacillus* sp; Alkaline protease; Detergent; Plackett–Burman design; FCCCD; Response surface methodology; Repression **39**, 2115

Effectiveness factor; Immobilised enzyme; Diffusional restrictions; Modeling; Kinetic models **39**, 393

Effluent treatment; Vermicompost; Heavy metals; Cd(II), Cu(II), Pb(II) and Zn(II) ions **39**, 81

Electrochemical; Chlorination; Free radical; Ozonation; Scanning electron microscopy (SEM); Wastewater disinfection **39**, 1421

Electrodialysis (ED); *Lactobacillus rhamnosus*; Electrodialysis fermentation (EDF); Lactic acid **39**, 1903

Electrodialysis fermentation (EDF); *Lactobacillus rhamnosus*; Electrodialysis (ED); Lactic acid **39**, 1903

Electroporation; *Chlamydomonas reinhardtii*; Mutant *CW-15* without a cell wall; Transformation; Gene *hpt* – hygromycin phosphotransferase **39**, 1685

Elicitation; Immobilisation; Chitosan; Pectin; Stress metabolism; *Cruciata glabra*; *Vitis vinifera* **39**, 1369

Elicitor; Paclitaxel; *Taxus chinensis*; Precursor; Response–surface methodology; Nutrient feeding **39**, 1073

Elicitors; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase); GPX (guaiacol peroxidase); Sprouts; Phytochemicals; Peptides; Phenolics; Antioxidants; Antimicrobials; *Helicobacter pylori* **39**, 637

Elimination capacity; Biofiltration; Trickle-bed air biofilter; Isopropyl alcohol; Acetone; Influent carbon loading **39**, 415

Ellagic acid; Cranberry pomace; *Lentinus edodes*; Phenolics; Phennolic aglycone; Antioxidant activity; β-Glucosidase; 1,1-Diphenyl-2-picrylhydrazyl radical (DPPH) inhibition system; β-Carotene oxidation model system **39**, 367

Encapsulation; Fermentation; Spray drying; *Beijerinckia* **39**, 1201

Encapsulation; Fermentation; Spray-drying; *Beijerinckia* **39**, 1275

Endochitinase; *Trichoderma harzianum*; Surface response methodology; *Escherichia coli* **39**, 2173

Endoglucanase I; Detergent-based aqueous two-phase systems; Large-scale extraction; Hydrophobin fusion protein **39**, 889

Endoglucanase; Cellulase; *Mucor circinelloides*; Cellulose; Carboxymethyl cellulose; Carboxymethyl cellulase **39**, 1871

Endoinulinase; *Aspergillus ficuum*; Inulinase; Exoinulinase; Native-PAGE; Production; Separation **39**, 5

Endopolygalacturonase; *Peacilomyces cla isporus* 2A.UMIDA.1; Pectinolytic activity **39**, 455

Energy balance; Fruit and vegetable waste; Anaerobic digestion; Temperature **39**, 2143

Entomopathogenic fungi; *Verticillium lecanii*; Submerged fermentation; Solid state fermentation; Chitin; Chitinases; *N*-Acetylglucosamine; Shrimp wastes **39**, 665

Environmental applications; Antioxidant response; Human health; Proline-linked oxidative phosphorylation; Phenolic antioxidants; Phytochemicals; Proline-linked pentose phosphate pathway **39**, 789

Enzymatic hydrolysis; Corrugated cardboard; Acid prehydrolysis; Glucose; Hemicellulosic sugars **39**, 1543

Enzymatic synthesis; Amino acid surfactants; Lipase; Response surface methodology (RSM); Free fatty acids; L-Lysine **39**, 1511

Enzymatic synthesis; Penicillin acylase; Cephalexin; β-Lactam antibiotics; Organic cosolvent **39**, 111

Enzymatic yields; *Aspergillus niger*; Invertase; Overproduction; Parasexual cycle; Solid fermentation; Water activity **39**, 2085

Enzyme activities; Manure composting; Solid phase method **39**, 971

Enzyme activity; *Candida rugosa*; Lipase; Hydrolytic reaction; Organic–aqueous two-phase; Surfactant **39**, 233

Enzyme development; Maize; Steeping; Malting; Polyphenols/tannins **39**, 1013

Enzyme immobilization; Protein purification; IMAC **39**, 1573

Enzyme kinetics; Horseradish peroxidase; Immobilization; Cinnamic carbohydrate esters; Peroxidase inactivation; Peroxidase stability **39**, 1455

Enzyme oil assisted process; *Guevina avellana mol*; Enzymic oil extraction; Oil extraction by pressing; Mechanical oil extraction; Pharmaceuticals oil **39**, 51

Enzyme production; Lipase; Surfactants; Fatty acids; Triglycerides; Carbon source **39**, 2109

Enzyme purification; Gypenoside-α-(1→6)-L-rhamnosidase; Gypenoside-5; Ginsenoside Rd **39**, 861

Enzyme reactor; Suspension polymerisation; Polymer microbeads; Immobilisation; Tyrosinase **39**, 2007

Enzyme thermostability; α-Chymotrypsin; Cyclodextrin; Modified enzyme; Supramolecular interaction **39**, 535

Enzymes; Inhibition; Activation; Parametric classification; Correction of slope coordinates of activation **39**, 805

Enzymes; Three-dimensional $K'_mV'I$ and two-dimensional K'_mV coordinate systems; Intensity of inhibition; Geometric portrait of inhibition; Total effect of enzymes inhibition **39**, 825

Enzymic oil extraction; *Guevina avellana mol*; Oil extraction by pressing; Mechanical oil extraction; Enzyme oil assisted process; Pharmaceuticals oil **39**, 51

Enzymic synthesis; Central composite rotatable design (CCRD); Esterification; Isoamyl butyrate, *Rhizopus* sp. lipase; *Geotrichum* sp. lipase; Response surface methodology (RSM) **39**, 687

Epicatechin; Antioxidant enzymes; GSH; Lipid peroxidation; Fasted rats **39**, 1525

Epoxide silanization; Immobilization; 7-ACA; GL-7-ACA acylase; 3-Glycidoxypropyltrimethoxysilane **39**, 359

Equations for calculation of initial rates; Inhibition and activation of enzymes; Analysis of equations; Examples of calculation of the constants of activation **39**, 815

Equilibrium; Cyclodextrins; Applications; Inclusion complex; Complexation techniques **39**, 1033

Equilibrium; Pseudo-isotherm; Pseudo-second order; Kinetics; Adsorption **39**, 759

Ergosterol; Bioprocess; Bioreactors; Fed-batch culture; Fermentation; *Saccharomyces cererisiae* **39**, 345

Erythritol; Lipase; Condensation; Lauric acid; Oleic acid; Packed-bed reactor **39**, 681

Escherichia coli 0157:H7; Solid-state bioprocessing; Antimicrobial activity; *Listeria monocytogenes*; *Vibrio parahaemolyticus*; *Rhizopus oligosporus* **39**, 1939

Escherichia coli; Carnitine; Resting cells; Biotransformation; Reuse cells **39**, 287

Escherichia coli; Endochitinase; *Trichoderma harzianum*; Surface response methodology **39**, 2173

Escherichia coli; *Lactobacillus helveticus*; Photocatalytic inactivation; TiO_2; UV; ZnO **39**, 475

Escherichia coli; Methylphosphonate; Biodegradation; CP lyase **39**, 1063

Escherichia coli; Structured modeling; Compartment; *Taq I*; Induced expression; T7 phage promoter **39**, 315

Esterification behaviour; Competitive binding; RSM plots; Alcohol binding; Lipase; Acid binding; Thermal stability; Plackett–Burman design; Selection of alcohol or acid **39**, 847

Esterification; Central composite rotatable design (CCRD); Enzymic synthesis; Isoamyl butyrate, *Rhizopus* sp. lipase; *Geotrichum* sp. lipase; Response surface methodology (RSM) **39**, 687

Esterification; Lipase; *Penicillium camembertii*; Purification; Acetate hexanoate **39**, 1495

Estimation of NH_3 evolution; Food waste composting; Fed-batch operation; Operating indices; Exhaust gas condensate **39**, 1047

Estimation; Solid-state cultivation (SSC); Monitoring; Secondary metabolite; Filtering **39**, 1701

Ethanol; D-Xylose; Fermentation; *Pachysolen tannophilus*; Temperature; Xylitol **39**, 673

Ethanol; SE-poplar wood; Detoxification methods; SHF; SSF **39**, 1533

Ethylene; Activated carbon; Benzene; Biofilter; Degradation; Filter media **39**, 447

Eucalyptus hydrolysate; Treatment; *Candida guilliermondii*; Fermentation and xylitol production **39**, 1909

Examples of calculation of the constants of activation; Inhibition and activation of enzymes; Equations for calculation of initial rates; Analysis of equations **39**, 815

Excess Gibbs energy; Thermodynamics; Aqueous two-phase systems; Biomolecules **39**, 2075

Excess sludge; MBR; Ultrasound; Biological treatment; Phosphorus removal **39**, 1923

Exhaust gas condensate; Food waste composting; Fed-batch operation; Operating indices; Estimation of NH_3 evolution **39**, 1047

Exoinulinase; *Aspergillus ficuum*; Inulinase; Endoinulinase; Native-PAGE; Production; Separation **39**, 5

Exopolyphosphatase; Polyphosphate; Substrate specificity; Phosphate overplus; Cytosol; Culture conditions; *Saccharomyces cerevisiae* **39**, 1625

Exopolysaccharide; *Antrodia camphorata*; Submerged fermentation; Two-stage pH process; Molecular weight; pH **39**, 931

Expanded bed chromatography; Amylase; Cellulase; CELBEADS; Composite matrices; Affinity **39**, 565

Experimental design; Biosurfactant; *Serratia*; Gasoline **39**, 2277

Experimental design; Cyclodextrin glucanotransferase **39**, 2053

Expression and purification; Antimicrobial peptide; Buforin IIb; Chemical cleavage; Fusion protein **39**, 1731

Expression; Transglutaminase; Cloning; *Streptoverticillium ladakanum*; *Streptomyces lividans* **39**, 591

Extracellular polymers; Activated sludge; Complexation; Polarography; Heavy metal **39**, 833

Extracellular protease; Optimization; *Pseudomonas* sp; Response surface methodology; Central composite design; Artificial neural network; Radial basis function **39**, 2193

Extractant; Remediation; Process; Vegetable oil; Polycyclic aromatic hydrocarbons **39**, 1211

Extraction; *Calothrix* sp; Cyanobacteria; Lysozyme; Phycocyanin; Purification **39**, 2047

Fasted rats; Epicatechin; Antioxidant enzymes; GSH; Lipid peroxidation **39**, 1525

Fatty acids; Lipase; Enzyme production; Surfactants; Triglycerides; Carbon source **39**, 2109

FCCCD; *Bacillus* sp; Alkaline protease; Detergent; Plackett–Burman design; Response surface methodology; Repression; Economy **39**, 2115

Fe(III)-modified SEWS; Adsorption; Cr(VI); Steam exploded wheat straw (SEWS); Desorption **39**, 541

Fed-batch cultivation; *Dictyostelium discoideum*; Axenic media; Synthetic medium; Bioreactor; Batch cultivation **39**, 585

Fed-batch culture; *Bacillus sphaericus*; Alkaline protease; Kinetic analysis **39**, 1093

Fed-batch culture; Bioprocess; Bioreactors; Fermentation; Ergosterol; *Saccharomyces cererisiae* **39**, 345

Fed-batch culture; Interferon-α2a; Optimization; Recombinant yeast: *Saccharomyces cerevisiae* **39**, 2069

Fed-batch operation; Boron inhibition; Biological treatment; Glucose; Activated sludge **39**, 721

Fed-batch operation; Food waste composting; Moisture content; Water extractable TOC; Composting rate **39**, 1183

Fed-batch operation; Food waste composting; Operating indices; Exhaust gas condensate; Estimation of NH_3 evolution **39**, 1047

Fed-batch; Poly (β-hydroxybutyrate) (PHB); *Ralstonia eutropha*; Optimisation; MATLAB **39**, 963

Fenton; Biological sludge; Conditioning; Dewatering **39**, 1503

Fenton's reagent; Table olive wastewater; *Aspergillus niger*; Biological treatment; Phenolic compounds; Hydrogen peroxide **39**, 1653

Fermentation and xylitol production; Eucalyptus hydrolysate; Treatment; *Candida guilliermondii* **39**, 1909

Fermentation; Bioprocess; Bioreactors; Fed-batch culture; Ergosterol; *Saccharomyces cererisiae* **39**, 345

Fermentation; Differential Evolution; Optimization **39**, 1709

Fermentation; D-Xylose; *Pachysolen tannophilus*; Temperature; Ethanol; Xylitol **39**, 673

Fermentation; Gluconic acid; Dissolved oxygen; Growth; Non-growth conditions **39**, 1341

Fermentation; Glycerol production; *Saccharomyces cerevisiae*; Osmophilic yeast; Growth kinetics; Wine **39**, 1285

Fermentation; Lipase; *Candida* sp; Mutation **39**, 459

Fermentation; *Poly(hydroxyalkanoates); Acidification; VFA* **39**, 295

Fermentation; Spray drying; *Beijerinckia*; Encapsulation **39**, 1201

Fermentation; Spray-drying; *Beijerinckia*; Encapsulation **39**, 1275

Fermentation; Starch bioconversion; Flux analysis; Metabolic modeling; *Saccharomyces cerevisiae*; Stressed cells **39**, 2097

Fermentation; Xanthan gum; Biomass; Molasses; *X. campestris* **39**, 249

Fermentative bioconversion; Mixed microbial culture; Horizontal rotating tubular bioreactor (HRTB); Bioreactor potential use; Bioreactor comparison **39**, 995

Ferrous iron; Biooxidation; Immobilization; Packed-bed bioreactor; Poly(-vinyl alcohol); *Acidithiobacillus ferrooxidans* **39**, 2129

Fibrin plate; Alternating current; Field intensity; Glomerulo nephritis; Urokinase; Voltage **39**, 1

Field intensity; Alternating current; Fibrin plate; Glomerulo nephritis; Urokinase; Voltage **39**, 1

Filamentous fungi; pH; Xylanase; Cellulase; Lactose; *Trichoderma reesei* **39**, 729

Filter media; Activated carbon; Benzene; Biofilter; Degradation; Ethylene **39**, 447

Filtering; Solid-state cultivation (SSC); Monitoring; Estimation; Secondary metabolite **39**, 1701

Fish scale; Angiotensin I converting enzyme inhibitory peptides; Antihypertensive activity; Spontaneously hypertensive rats; Hydrolysate purification **39**, 1195

Flavours; *Acetobacter aceti*; Immobilized cells; 2-Phenyl-l-ethanol; Phenylacetic acid; Phenylacetaldehyde **39**, 747

Flavourzyme; Angiotensin I converting enzyme; Corn gluten; Solubility; Water sorption **39**, 989

Floating media; Backwashing; Biofilter; BOD removal; Nitrification; Upflow; Volumetric loading **39**, 765

Fluidised-bed reactor; Mesophilic anaerobic digestion; Wastewater; Protein isolates; Chickpea flour **39**, 1913

Fluidized bed reactor; β-Galactosidase; *Kluyveromyces fragilis*; Lactose hydrolysis; Lactoyzm™; Low lactose milk; Whey hydrolysis **39**, 325

Fluidized bed reactor; Sulphur; Denitrification; Nitrous oxide; Loading rate **39**, 1591

Fluoride; Nitrification; Inhibition; Activated sludge; Frost glass **39**, 73

Flux analysis; Starch bioconversion; Fermentation; Metabolic modeling; *Saccharomyces cerevisiae*; Stressed cells **39**, 2097

Fonsecaea pedrosoi; Melanin; Nitrogen source; Tricyclazole; Fungal mass; Chromoblastomycosis **39**, 633

Food waste composting; Fed-batch operation; Moisture content; Water extractable TOC; Composting rate **39**, 1183

Food waste composting; Fed-batch operation; Operating indices; Exhaust gas condensate; Estimation of NH_3 evolution **39**, 1047

Forced convection drying; Microwave assisted drying; Soybean; Trypsin inhibitor; Unsaturated fatty acids **39**, 483

FPH (fish protein hydrosylates); Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; Sports; phytochenucals; peptides; phenolics; antioxidants; antimicrobials; Helicobacter phlori **39**, 637

Fractionation; Polysulphone; Hollow-fibre membranes; IMAC; Pectic enzyme **39**, 1017

Free ammonia; Ammonia oxidation; Nitrification; Nitrite accumulation; Nitrite; Kinetics **39**, 1223

Free fatty acids; Amino acid surfactants; Enzymatic synthesis; Lipase; Response surface methodology (RSM); L-Lysine **39**, 1511

Free radical; Chlorination; Electrochemical; Ozonation; Scanning electron microscopy (SEM); Wastewater disinfection **39**, 1421

Freeze-concentration; Bacteria; Ice-nucleating activity **39**, 405

Freeze-drying; Probiotic bacteria; Protection; Trehalose; Storage; Moisture **39**, 1081

Freundlich; Chitosan; Acid dyes; Langmuir; Redlich–Peterson; Adsorption isotherms **39**, 693

Frost glass; Nitrification; Inhibition; Fluoride; Activated sludge **39**, 73

Fructo-oligosaccharides; *Aspergillus oryzae*; *Aureobasidium pullulans*; Transfructosylation; Fructosyl transferase **39**, 753

Fructosyl transferase; *Aspergillus oryzae*; *Aureobasidium pullulans*; Transfructosylation; Fructo-oligosaccharides **39**, 753

Fruit and vegetable waste; Anaerobic digestion; Temperature; Energy balance **39**, 2143

Fruit juice; Chitosan; Clarification; Sensory evaluation **39**, 2229

Fuc-1-PA; Recombinant aldolases; Growth medium; IPTG induction; *E. coli* **39**, 1677

Fungal mass; *Fonsecaea pedrosoi*; Melanin; Nitrogen source; Tricyclazole; Chromoblastomycosis **39**, 633

Fungal mycelia; Chitosan; Solid substrate fermentation; Sweet potato; Urea **39**, 1639

Fungi; Activity; Biotransformation; Oxygen uptake rate; Process-monitoring; monitoring; Terpene **39**, 2221

Fusarium oxysporum; *N*-Acetyl-β-D-glucosaminidase; Production; Solid-state fermentation; Purification **39**, 1599

***Fusarium* sp**; *Aspergillus* sp; *Penicillium* sp; *Graphium* sp; Biodegradation; Phenol **39**, 1001

Fusarium; Maltose; Glucose; Pyruvate; Ascorbat; Antioxidant enzymes **39**, 1519

Fusion protein; Antimicrobial peptide; Buforin IIb; Chemical cleavage; Expression and purification **39**, 1731

β-Galactosidase; Fluidized bed reactor; *Kluyveromyces fragilis*; Lactose hydrolysis; Lactoyzm™; Low lactose milk; Whey hydrolysis **39**, 325

β-Galactosidase; *Kluyveromyces lactis*; Yeast; Disruption; Immobilization; Gelatin **39**, 703

Gamma-irradiation; RNase *Th*; UV-spectra; Amino acid composition **39**, 2257

Ganoderma lucidum; Stillage grain; Solid-state fermentation; Reutilization **39**, 21

Gas-lift reactor; Hydrogen; Sludge retention time; Sulphate reduction; Methanogenesis; Homoacetogenesis **39**, 491

Gasoline; Biosurfactant; *Serratia*; Experimental design **39**, 2277

Gelatin; *Kluyveromyces lactis*; Yeast; Disruption; β-Galactosidase; Immobilization **39**, 703

Gene *hpt* – hygromycin phosphotransferase; *Chlamydomonas reinhardtii*; Mutant *CW-15* without a cell wall; Transformation; Electroporation **39**, 1685

Gentamicin; Peptidoglycan; Metal ions; *Micromonospora echinospora* **39**, 1145

Geometric portrait of inhibition; Enzymes; Three-dimensional $K'_mV'I$ and two-dimensional K'_mV coordinate systems; Intensity of inhibition; Total effect of enzymes inhibition **39**, 825

Geotrichum candidum; *Penicillium camembertii*; Batch cultures; Carbon and nitrogen yields; Metabolites production **39**, 1449

Geotrichum fragrans; Cassava; Aroma; Liquid waste; Volatile compounds **39**, 411

Geotrichum sp. lipase; Central composite rotatable design (CCRD); Enzymic synthesis; Esterification; Isoamyl butyrate, *Rhizopus* sp. lipase; Response surface methodology (RSM) **39**, 687

Germination; Sorghum; Steeping; Moisture; Carboxypeptidase; Proteinase **39**, 711

Ginsenoside Rd; Gypenoside-α-(1→6)-L-rhamnosidase; Gypenoside-5; Enzyme purification **39**, 861

GL-7-ACA acylase; Immobilization; 7-ACA; Epoxide silanization; 3-Glycidoxypropyltrimethoxysilane **39**, 359

Glomerulo nephritis; Alternating current; Field intensity; Fibrin plate; Urokinase; Voltage **39**, 1

β-Glucanase; Osmotic stress; Recombinant; *E. coli* **39**, 307

β-1,3-Glucanase; *Trichoderma harzianum*; Stability; Inhibition; Deactivation; Kinetics **39**, 149

Glucoamylase; *Aspergillus*; *Bacillus*; α-Amylase; Solid state fermentation; Starch hydrolysis; Thermostable **39**, 185

Gluconic acid; Fermentation; Dissolved oxygen; Growth; Non-growth conditions **39**, 1341

Gluconobacter oxydans; Dextran dextrinase; Central composite design; Medium optimization **39**, 1299

Glucose; Animal cell culture; CHO cell; Glutamine **39**, 717

Glucose; Boron inhibition; Fed-batch operation; Biological treatment; Activated sludge **39**, 721

Glucose; *Chlorella zofingiensis*; Astaxanthin; Nitrate; Mixotrophic culture **39**, 1761

Glucose; Corrugated cardboard; Acid prehydrolysis; Enzymatic hydrolysis; Hemicellulosic sugars **39**, 1543

Glucose; Fusarium; Maltose; Pyruvate; Ascorbat; Antioxidant enzymes **39**, 1519

Glucose; Immobilization; Citric acid; *Aspergillus niger*; Physiology **39**, 1963

β-Glucosidase; Cranberry pomace; Ellagic acid; *Lentinus edodes*; Phenolics; Phennolic aglycone; Antioxidant activity; 1,1-Diphenyl-2-picrylhydrazyl radical (DPPH) inhibition system; β-Carotene oxidation model system **39**, 367

β-Glucosidase; Phenolic antioxidants; Pineapple residue; Soy; *Rhizopus oligosporus*; Solid-state bioconversion **39**, 2167

Glucosidase; Soybean; Amylase; Glucuronidase; Peroxidase; Phenolic aglycones; Antioxidant; Nutritional functionality **39**, 1785

Glucosyltransferase; Cacao bean husk; *Theobroma cacao*; Anticaries; Polyphenols **39**, 2043

Glucuronidase; Soybean; Glucosidase; Amylase; Peroxidase; Phenolic aglycones; Antioxidant; Nutritional functionality **39**, 1785

Glutamine; Animal cell culture; CHO cell; Glucose **39**, 717

-L-Glutamyl-L-cysteinyl-glycine (GSH); Spent brewer's yeast cell; Biotransformation; *S*-Adenosyl-L-methionine (AdoMet); L-Methionine **39**, 1993

Glutaraldehyde; Catalase; Magnesium silicate; Covalent immobilization; 3-Aminopropionic acid **39**, 2149

Gluten pellets; Glycerol; Immobilized yeast cells; Wine making; Delignified cellulosic material **39**, 499

Glycerol fermentation; *Candida krusei*; Oxygen limitation; Cytosolic glycerol-3-phosphate dehydrogenase (ctGPD); Glycerol-3-phosphatase (GPP); Mitochondrial glycerol-3-phosphate dehydrogenase (mtGPD) **39**, 1899

Glycerol production kinetics; *Candida krusei*; Repeated batch fermentation; Glycerol **39**, 1507

Glycerol production; *Saccharomyces cerevisiae*; Fermentation; Osmophilic yeast; Growth kinetics; Wine **39**, 1285

Glycerol; *Candida krusei*; Repeated batch fermentation; Glycerol production kinetics **39**, 1507

Glycerol; Immobilized yeast cells; Wine making; Delignified cellulosic material; Gluten pellets **39**, 499

Glycerol-3-phosphatase (GPP); *Candida krusei*; Oxygen limitation; Glycerol fermentation; Cytosolic glycerol-3-phosphate dehydrogenase (ctGPD); Mitochondrial glycerol-3-phosphate dehydrogenase (mtGPD) **39**, 1899

3-Glycidoxypropyltrimethoxysilane; Immobilization; 7-ACA; GL-7-ACA acylase; Epoxide silanization **39**, 359

Glycoprotein; β-Xylosidase; Xylobiase; *Aspergillus versicolor* **39**, 1931

G6PDH (glucose-6-phosphate dehydrogenase); Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; GPX cguaiacol peroxidase; Sports; phytochenucals; peptides; phenolics; antioxidants; Helicobacter phlori **39**, 637

GPX cguaiacol peroxidase; Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase); Sports; phytochenucals; peptides; phenolics; antioxidants; Helicobacter phlori **39**, 637

Granular sludge; Anaerobic bio-methanization; Suspended sludge; Kitchen waste; Waste/inoculum ratio; Alkalinity **39**, 2019

Granular sludge; UASB; Calcium hardness; CO_2-stripper **39**, 1393

Granulation; Aerobic granular sludge; SBR; Selective pressure; Microscopic observation **39**, 557

Granulation; UASB; Pentachlorophenol; Granule; Reductive dechlorination; Acclimation **39**, 1249

Granule; UASB; Granulation; Pentachlorophenol; Reductive dechlorination; Acclimation **39**, 1249

***Graphium* sp**; *Fusarium* sp; *Aspergillus* sp; *Penicillium* sp; Biodegradation; Phenol **39**, 1001

Growth kinetics; *Dictyostelium discoideum*; Cell density; Axenic media; Carbohydrates; Ammonia **39**, 333

Growth kinetics; Glycerol production; *Saccharomyces cerevisiae*; Fermentation; Osmophilic yeast; Wine **39**, 1285

Growth medium; Recombinant aldolases; Fuc-1-PA; IPTG induction; *E. coli* **39**, 1677

Growth; *Artemisia annua* L; Shoot culture; Artemisinin biosynthesis; Bioreactor; Plant-specific valuable metabolite production **39**, 45

Growth; Gluconic acid; Fermentation; Dissolved oxygen; Non-growth conditions **39**, 1341

GSH; Epicatechin; Antioxidant enzymes; Lipid peroxidation; Fasted rats **39**, 1525

Guevina avellana mol; Enzymic oil extraction; Oil extraction by pressing; Mechanical oil extraction; Enzyme oil assisted process; Pharmaceuticals oil **39**, 51

Gypenoside-α-(1→6)-L-rhamnosidase; Gypenoside-5; Ginsenoside Rd; Enzyme purification **39**, 861

Gypenoside-5; Gypenoside-α-(1→6)-L-rhamnosidase; Ginsenoside Rd; Enzyme purification **39**, 861

Hairy roots; *Beta vulgaris*; Bubble column reactor; Polyamines; Methyl jasmonate; Pigment release; CTAB **39**, 2091

Heat shock; Microwave treatment; Antioxidant activity; L-DOPA; *Vicia faba*; Parkinson's diet **39**, 1775

Heavy metal; Activated sludge; Complexation; Polarography; Extracellular polymers **39**, 833

Heavy metal; Chromium; *Saccharomyces cerevisiae*; protein; RNA/DNA ratio **39**, 1231

Heavy metals; Aquatic plants; Biosorption; Langmuir model; Pseudo second order **39**, 179

Heavy metals; Vermicompost; Cd(II), Cu(II), Pb(II) and Zn(II) ions; Effluent treatment **39**, 81

Helicobacter phlori; Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; Sports; phytochenucals; peptides; phenolics; antioxidants **39**, 637

Hemicellulosic sugars; Corrugated cardboard; Acid prehydrolysis; Enzymatic hydrolysis; Glucose **39**, 1543

High-strength ammonium industrial wastewater; Biological nitrogen removal process; Influent COD/N ratio; Nitrification rate **39**, 2035

Hollow-fibre membranes; Polysulphone; IMAC; Pectic enzyme; Fractionation **39**, 1017

Homoacetogenesis; Gas-lift reactor; Hydrogen; Sludge retention time; Sulphate reduction; Methanogenesis **39**, 491

Horizontal rotating tubular bioreactor (HRTB); Fermentative bioconversion; Mixed microbial culture; Bioreactor potential use; Bioreactor comparison **39**, 995

Horseradish peroxidase; Immobilisation; PET-PANI composite; Stability; Reuse; Kinetic parameters **39**, 883

Horseradish peroxidase; Immobilization; Cinnamic carbohydrate esters; Enzyme kinetics; Peroxidase inactivation; Peroxidase stability **39**, 1455

Horseradish peroxidase; Polyaniline; Immobilisation; Stability; Kinetic parameters **39**, 957

Hospital wastewater; Submerged membrane bioreactor; Treatment **39**, 1427

H_2S; Biofiltration; *Thiobacillus thioparus*; Peat; Hydrogen sulphide **39**, 165

Human β-defensin-2; Antimicrobial peptide; Soluble protein; Optimization **39**, 2199

Human health; Antioxidant response; Environmental applications; Proline-linked oxidative phosphorylation; Phenolic antioxidants; Phytochemicals; Proline-linked pentose phosphate pathway **39**, 789

Hybrid system; Solid state fermentation; Submerged fermentation; Organic solid waste treatment; Biodegradation **39**, 37

Hybrid; Volatile fatty acids; Anaerobic; pH **39**, 1491

Hydrogen peroxide; Table olive wastewater; *Aspergillus niger*; Biological treatment; Phenolic compounds; Fenton's reagent **39**, 1653

Hydrogen sulphide; H_2S; Biofiltration; *Thiobacillus thioparus*; Peat **39**, 165

Hydrogen; Gas-lift reactor; Sludge retention time; Sulphate reduction; Methanogenesis; Homoacetogenesis **39**, 491

Hydrolysate purification; Fish scale; Angiotensin I converting enzyme inhibitory peptides; Antihypertensive activity; Spontaneously hypertensive rats **39**, 1195

Hydrolysis rate; Palm oil; Lipase; Operating variables; Stirred bio-reactor **39**, 13

Hydrolysis; α-Amylase; Production; *Bacillus subtilis*; Starch **39**, 1745

Hydrolysis; D-Aminoacylase; Acylated amino acids; D-Amino acids; *Trichoderma*; Constitutive enzyme **39**, 1119

Hydrolysis; Fermentation; Total volatile fatty acids (TVFA); Fixed-bed reactor (FAS); Suspended biomass reactor (FER); Hydraulic retention time (HRT); Nutrient biological removal; Organic volumetric loading rate; Ambient temperature **39**, **Hydrolysis**; Immobilized spores; Cellobiase; Cellobiose; Cellulase; Corncob **39**, 1363

Hydrolysis; Sucrose; Invertase; Multiple steady states; CSTR; Reactor **39**, 2179

Hydrolytic reaction; *Candida rugosa*; Lipase; Enzyme activity; Organic–aqueous two-phase; Surfactant **39**, 233

Hydrophobicity; Organic solvent; Permeabilization; Penicillin G acylase; Dielectric constant; Recombinant; *E.coli* **39**, 301

Hydrophobin fusion protein; Detergent-based aqueous two-phase systems; Large-scale extraction; Endoglucanase I **39**, 889

Ice-nucleating activity; Freeze-concentration; Bacteria **39**, 405

IMAC; Polysulphone; Hollow-fibre membranes; Pectic enzyme; Fractionation **39**, 1017

IMAC; Protein purification; Enzyme immobilization **39**, 1573

Immobilisation; Elicitation; Chitosan; Pectin; Stress metabolism; *Cruciata glabra*; *Vitis vinifera* **39**, 1369

Immobilisation; PET-PANI composite; Horseradish peroxidase; Stability; Reuse; Kinetic parameters **39**, 883

Immobilisation; Polyaniline; Horseradish peroxidase; Stability; Kinetic parameters **39**, 957

Immobilisation; Suspension polymerisation; Polymer microbeads; Tyrosinase; Enzyme reactor **39**, 2007

Immobilised enzyme; Diffusional restrictions; Modeling; Kinetic models; Effectiveness factor **39**, 393

Immobilization; 7-ACA; GL-7-ACA acylase; Epoxide silanization; 3-Glycidoxypropyltrimethoxysilane **39**, 359

Immobilization; *Acetobacter aceti*; Acetic acid fermentation; Siran; Wood chips; Polyurethane foam **39**, 547

Immobilization; Acid phosphatase; Composite beads; Chitosan; Activated clay; Catalytic kinetics; Stability **39**, 1087

Immobilization; Biological nitrogen removal; Bioreactor; Carbon source recycling **39**, 1269

Immobilization; Biooxidation; Ferrous iron; Packed-bed bioreactor; Poly(-vinyl alcohol); *Acidithiobacillus ferrooxidans* **39**, 2129

Immobilization; Biosorption; Algal cells; Nickel; Isotherms **39**, 1767

Immobilization; *Dictyostelium discoideum*; Mass cultivation; Synthetic medium; Pumice; Ceramic carrier **39**, 1859

Immobilization; Glucose; Citric acid; *Aspergillus niger*; Physiology **39**, 1963

Immobilization; Horseradish peroxidase; Cinnamic carbohydrate esters; Enzyme kinetics; Peroxidase inactivation; Peroxidase stability **39**, 1455

Immobilization; *Kluyveromyces lactis*; Yeast; Disruption; β-Galactosidase; Gelatin **39**, 703

Immobilization; Lipase; Production; *Aspergillus niger*; Alginate; κ-Carrageenan; Polyacrylamide **39**, 525

Immobilized activated sludge; Biosorption; Phenol; Packed bed column; Breakthrough curve **39**, 599

Immobilized cells; *Acetobacter aceti*; 2-Phenyl-l-ethanol; Phenylacetic acid; Phenylacetaldehyde; Flavours **39**, 747

Immobilized cells; Alkaline protease production; Calcium alginate; Repeated batch fermentation **39**, 1331

Immobilized cells; Wine; Continuous fermentation; Quince; Yeast **39**, 143

Immobilized cells; Xylitol; Sugarcane bagasse hydrolysate; Ca-alginate beads; Stirred tank reactor **39**, 2135

Immobilized lipase; *Candida rugosa*; Cuprophane hollow fibre; Palm oil hydrolysis; Membrane reactor; Reactor operating regime **39**, 1377

Immobilized metal-ion affinity chromatography; Infectious bursal disease virus; Virus-like particle; Insect larvae **39**, 571

Immobilized *Phanerochaete chrysosporium*; Solid state fermentation; MnP; Purification; Characterization **39**, 2061

Immobilized spores; Cellobiase; Cellobiose; Cellulase; Corncob; Hydrolysis **39**, 1363

Immobilized yeast cells; Glycerol; Wine making; Delignified cellulosic material; Gluten pellets **39**, 499

Inactivation; Corn, rice and wheat starch hydrolysis; α-Amylase; Temperature; Processing time; Mathematical modelling; Stirred batch bioreactor **39**, 1137

Inclusion complex; Cyclodextrins; Applications; Equilibrium; Complexation techniques **39**, 1033

Induced expression; *Escherichia coli*; Structured modeling; Compartment; *Taq I*; T7 phage promoter **39**, 315

Inducers; White-rot fungi; Laccase; Nutritional factors; Decolorization **39**, 1415

+/-Inducible effect of β-propiolactone homologs on enhancement of bactericidal action; β-Propiolactone; β-Propiolactone homologs **39**, 1465

Infectious bursal disease virus; Virus-like particle; Insect larvae; Immobilized metal-ion affinity chromatography **39**, 571

Influent carbon loading; Biofiltration; Trickle-bed air biofilter; Isopropyl alcohol; Acetone; Elimination capacity **39**, 415

Influent COD/N ratio; Biological nitrogen removal process; High-strength ammonium industrial wastewater; Nitrification rate **39**, 2035

Inhibition and activation of enzymes; Equations for calculation of initial rates; Analysis of equations; Examples of calculation of the constants of activation **39**, 815

Inhibition; Enzymes; Activation; Parametric classification; Correction of slope coordinates of activation **39**, 805

Inhibition; Kinetics; Anaerobic digestion; Two-phase olive mill effluents (TPOME); Phenolic compounds **39**, 425

Inhibition; Moving bed biofilm reactor; Phenolic wastes; Shock load; Toxic waste; Phenol biodegradability **39**, 1177

Inhibition; Nitrification; Fluoride; Activated sludge; Frost glass **39**, 73

Inhibition; Phthalate ester; Activated sludge; Acclimation; Biodegradation; Priority pollutant **39**, 1831

Inhibition; *Trichoderma harzianum*; β-1,3-Glucanase; Stability; Deactivation; Kinetics **39**, 149

Insect larvae; Infectious bursal disease virus; Virus-like particle; Immobilized metal-ion affinity chromatography **39**, 571

Integrated oxidation ditch; Vertical circle; Wastewater treatment **39**, 1111

Intensity of inhibition; Enzymes; Three-dimensional $K'_mV'I$ and two-dimensional K'_mV coordinate systems; Geometric portrait of inhibition; Total effect of enzymes inhibition **39**, 825

Interaction; Benzene; Biodegradation; Phenol; *Pseudomonas putida* F1; Toluene **39**, 983

Interferon-α2a; Optimization; Fed-batch culture; Recombinant yeast: *Saccharomyces cerevisiae* **39**, 2069

Internal recycle; Nitrogen removal; Nitrification; Denitrification; A^2/O process **39**, 1615

Introduction; Biodegradation; Black oil; Aboriginal microflora; Biopreparation **39**, 1671

Inulinase; *Aspergillus ficuum*; Exoinulinase; Endoinulinase; Native-PAGE; Production; Separation **39**, 5

Invertase; *Aspergillus niger*; Overproduction; Parasexual cycle; Solid fermentation; Water activity; Enzymatic yields **39**, 2085

Invertase; Sucrose; Hydrolysis; Multiple steady states; CSTR; Reactor **39**, 2179

Ion exchange; Recovery; Process; Isolate; Lactalbumin **39**, 1737

IPTG induction; Recombinant aldolases; Fuc-1-PA; Growth medium; *E. coli* **39**, 1677

Iron; Biosorption; *Streptomyces rimosus*; Waste-water treatment; Batch processing **39**, 1643

Irpex lacteus; Lignin modifying enzymes (LMEs); Textile dyes; White-rot fungi **39**, 1475

Isoamyl butyrate, *Rhizopus* sp. lipase; Central composite rotatable design (CCRD); Enzymic synthesis; Esterification; *Geotrichum* sp. lipase; Response surface methodology (RSM) **39**, 687

Isolate; Recovery; Ion exchange; Process; Lactalbumin **39**, 1737

Isopropyl alcohol; Biofiltration; Trickle-bed air biofilter; Acetone; Influent carbon loading; Elimination capacity **39**, 415

Isopropyl alcohol; Modeling; Biofiltration; Trickle-bed air biofilter; Acetone; Sensitivity analysis; Performance equation **39**, 1849

Isosafrol; Microbial screening; Biotransformation; Peroxidase; Oxidation; Piperonal **39**, 2269

Isotherm; Adsorption; Copper(II); Dehydrated wheat bran (DWB); Thermodynamic parameters **39**, 2183

Isotherms; Biosorption; Immobilization; Algal cells; Nickel **39**, 1767

Jet loop reactor; Cheese whey; Membrane filtration; Membrane bioreactor **39**, 2283

Kinetic analysis; *Bacillus sphaericus*; Alkaline protease; Fed-batch culture **39**, 1093

Kinetic analysis; Batch denitrifying reactor; Continuous-flow stirred reactor; Denitrification; Mixed bacterial culture; Nitrite accumulation **39**, 95

Kinetic models; Date pits; Langmuir; Activation; Dyes **39**, 193

Kinetic models; Immobilised enzyme; Diffusional restrictions; Modeling; Effectiveness factor **39**, 393

Kinetic parameters; Immobilisation; PET-PANI composite; Horseradish peroxidase; Stability; Reuse **39**, 883

Kinetic parameters; Nitrification; Substrate inhibition; Suspended and immobilised biomasses; Wastewater treatment **39**, 1159

Kinetic parameters; Polyaniline; Horseradish peroxidase; Immobilisation; Stability **39**, 957

Kinetics; Ammonia oxidation; Free ammonia; Nitrification; Nitrite accumulation; Nitrite **39**, 1223

Kinetics; Carbohydrates utilisation; Citric acid production; *Aspergillus niger* **39**, 2261

Kinetics; Inhibition; Anaerobic digestion; Two-phase olive mill effluents (TPOME); Phenolic compounds **39**, 425

Kinetics; Lyocell; Viscose; Cellulose; Cellulase; Adsorption **39**, 257

Kinetics; Phthalate esters; Microbial; Biodegradation; *Pseudomonas fluoresences* FS1 **39**, 1125

Kinetics; Phthalic acid esters; Biodegradation; Priority pollutant; Bioremediation; Bioaugmentation **39**, 1837

Kinetics; Pseudo-isotherm; Pseudo-second order; Equilibrium; Adsorption **39**, 759

Kinetics; *Trichoderma harzianum*; β-1,3-Glucanase; Stability; Inhibition; Deactivation **39**, 149

Kitchen waste; Anaerobic bio-methanization; Granular sludge; Suspended sludge; Waste/inoculum ratio; Alkalinity **39**, 2019

Kluyveromyces fragilis; Fluidized bed reactor; β-Galactosidase; Lactose hydrolysis; Lactoyzm™; Low lactose milk; Whey hydrolysis **39**, 325

Kluyveromyces lactis; Yeast; Disruption; β-Galactosidase; Immobilization; Gelatin **39**, 703

Kluyveromyces marxianus; Bioethanol; Lignocellulosic biomass; Simultaneous saccharification and fermentation **39**, 1843

Kraft effluent; Adsorbable organic halogens; Colour; Lignin; *Paecilomyces* sp; *Pseudomonas aeruginosa*; Sequential bioreactor **39**, 1693

Laccase; Airlift bioreactor; Characterisation; Phenol Red; Stability; *Trametes versicolor* **39**, 467

Laccase; Degradation; Phenol Red; Polymerisation; Redox mediator **39**, 1803

Laccase; *Pleurotus pulmonarius*; Phenoloxidase; Solid-state fermentation; Dye decolourisation **39**, 855

Laccase; White-rot fungi; Nutritional factors; Inducers; Decolorization **39**, 1415

Lactalbumin; Recovery; Ion exchange; Process; Isolate **39**, 1737

β-Lactam antibiotics; Penicillin acylase; Cephalexin; Enzymatic synthesis; Organic cosolvent **39**, 111

Lactic acid; *Lactobacillus rhamnosus*; Electrodialysis (ED); Electrodialysis fermentation (EDF) **39**, 1903

Lactobacillus helveticus; *Escherichia coli*; Photocatalytic inactivation; TiO_2; UV; ZnO **39**, 475

Lactobacillus plantarum; Olive oil; Phenolic compounds; Depolymerisation **39**, 841

Lactobacillus plantarum; Phenolic compounds; Olive Mill Wastewaters; Reductive decolorization **39**, 59

Lactobacillus rhamnosus; Electrodialysis (ED); Electrodialysis fermentation (EDF); Lactic acid **39**, 1903

Lactococcus lactis* ssp. *diacetylactis; Cold shock response; Cold shock proteins; Stationary phase **39**, 2233

Lactoferrin; Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; Sports; phytochenucals; peptides; phenolics; antioxidants; Helicobacter phlori **39**, 637

Lactose; Chitosan; Whey; Biochemical oxygen demand (BOD); Demineralization **39**, 381

Lactose; pH; Xylanase; Cellulase; *Trichoderma reesei*; Filamentous fungi **39**, 729

Lactoyzm™; Fluidized bed reactor; β-Galactosidase; *Kluyveromyces fragilis*; Lactose hydrolysis; Low lactose milk; Whey hydrolysis **39**, 325

Langmuir model; Aquatic plants; Biosorption; Heavy metals; Pseudo second order **39**, 179

Langmuir; Chitosan; Acid dyes; Freundlich; Redlich–Peterson; Adsorption isotherms **39**, 693

Langmuir; Date pits; Kinetic models; Activation; Dyes **39**, 193

Large-scale extraction; Detergent-based aqueous two-phase systems; Endoglucanase I; Hydrophobin fusion protein **39**, 889

Lauric acid; Lipase; Erythritol; Condensation; Oleic acid; Packed-bed reactor **39**, 681

L-DOPA; Heat shock; Microwave treatment; Antioxidant activity; *Vicia faba*; Parkinson's diet **39**, 1775

Leachate recirculation rate; Municipal solid waste; Bioreactor; Leachate recirculation **39**, 2157

Leachate recirculation; Municipal solid waste; Bioreactor; Leachate recirculation rate **39**, 2157

Leachate; Adsorption; Ammoniacal-nitrogen; Nitrification; Reed bed; Wastewater treatment **39**, 1971

Lentinus edodes; Cranberry pomace; Ellagic acid; Phenolics; Phennolic aglycone; Antioxidant activity; β-Glucosidase; 1,1-Diphenyl-2-picrylhydrazyl radical (DPPH) inhibition system; β-Carotene oxidation model system **39**, 367

Lignin modifying enzymes (LMEs); *Irpex lacteus*; Textile dyes; White-rot fungi **39**, 1475

Lignin; Adsorbable organic halogens; Colour; Kraft effluent; *Paecilomyces* sp; *Pseudomonas aeruginosa*; Sequential bioreactor **39**, 1693

Lignocellulosic biomass; Bioethanol; Simultaneous saccharification and fermentation; *Kluyveromyces marxianus* **39**, 1843

Lipase; Amino acid surfactants; Enzymatic synthesis; Response surface methodology (RSM); Free fatty acids; L-Lysine **39**, 1511

Lipase; Beef tallow; Biomass support particle (BSP); Poultry fat; *Rhizomucor miehei*; *Yarrowia lipolytica* **39**, 1347

Lipase; *Candida rugosa*; Enzyme activity; Hydrolytic reaction; Organic–aqueous two-phase; Surfactant **39**, 233

Lipase; *Candida* sp; Fermentation; Mutation **39**, 459

Lipase; Competitive binding; RSM plots; Alcohol binding; Esterification behaviour; Acid binding; Thermal stability; Plackett–Burman design; Selection of alcohol or acid **39**, 847

Lipase; Enzyme production; Surfactants; Fatty acids; Triglycerides; Carbon source **39**, 2109

Lipase; Erythritol; Condensation; Lauric acid; Oleic acid; Packed-bed reactor **39**, 681

Lipase; Palm oil; Hydrolysis rate; Operating variables; Stirred bio-reactor **39**, 13

Lipase; *Penicillium camembertii*; Purification; Esterification; Acetate hexanoate **39**, 1495

Lipase; Production; *Aspergillus niger*; Immobilization; Alginate; κ-Carrageenan; Polyacrylamide **39**, 525

Lipase; Purification; *Aspergillus* **39**, 239

Lipid peroxidation; Epicatechin; Antioxidant enzymes; GSH; Fasted rats **39**, 1525

Liquid waste; Cassava; Aroma; Volatile compounds; Geotrichum fragrans **39**, 411

Listeria monocytogenes; Solid-state bioprocessing; Antimicrobial activity; *Vibrio parahaemolyticus*; *Escherichia coli 0157:H7*; *Rhizopus oligosporus* **39**, 1939

L-Lysine; Amino acid surfactants; Enzymatic synthesis; Lipase; Response surface methodology (RSM); Free fatty acids **39**, 1511

Loading rate; Sulphur; Denitrification; Fluidized bed reactor; Nitrous oxide **39**, 1591

Low lactose milk; Fluidized bed reactor; β-Galactosidase; *Kluyveromyces fragilis*; Lactose hydrolysis; Lactoyzm™; Whey hydrolysis **39**, 325

Lyocell; Viscose; Cellulose; Cellulase; Kinetics; Adsorption **39**, 257

Lysozyme; *Calothrix* sp; Cyanobacteria; Phycocyanin; Extraction; Purification **39**, 2047

Magnesium silicate; Catalase; Covalent immobilization; Glutaraldehyde; 3-Aminopropionic acid **39**, 2149

Magnetic; Adsorption; Bromelain; Nanoparticles; Polyacrylic acid **39**, 2207

Maize; Steeping; Malting; Enzyme development; Polyphenols/tannins **39**, 1013

Malt; Milling; Mashing; Starch hydrolysis; Wort; Brewing **39**, 2213

Malting; Maize; Steeping; Enzyme development; Polyphenols/tannins **39**, 1013

Maltose; Fusarium; Glucose; Pyruvate; Ascorbat; Antioxidant enzymes **39**, 1519

Mannan; Mannanase; Copra; *Aspergillus niger* **39**, 1103

Mannanase; Mannan; Copra; *Aspergillus niger* **39**, 1103

Manure composting; Enzyme activities; Solid phase method **39**, 971

Manure; Thermophilic composting; Quinone profile; Microbial succession; Community structure; Physico-chemical properties **39**, 1999

Mashing; Malt; Milling; Starch hydrolysis; Wort; Brewing **39**, 2213

Mass cultivation; *Dictyostelium discoideum*; Synthetic medium; Immobilization; Pumice; Ceramic carrier **39**, 1859

Mathematical model; Theoretical and experimental quantum yield; *Rhodobacter capsulatus*; Anoxygenic phototrophic bacteria; Metabolism; Bioenergetic; Photosynthesis; Culture growth **39**, 939

Mathematical modelling; Corn starch hydrolysis; α-Amylase inactivation; Process variables; Stirred batch bioreactor **39**, 1877

Mathematical modelling; Corn, rice and wheat starch hydrolysis; α-Amylase; Inactivation; Temperature; Processing time; Stirred batch bioreactor **39**, 1137

MATLAB; Poly (β-hydroxybutyrate) (PHB); *Ralstonia eutropha*; Fed-batch; Optimisation **39**, 963

MBR; Ultrasound; Excess sludge; Biological treatment; Phosphorus removal **39**, 1923

Mechanical oil extraction; *Guevina avellana mol*; Enzymic oil extraction; Oil extraction by pressing; Enzyme oil assisted process; Pharmaceuticals oil **39**, 51

Mechanism of pyruvic acid production; Pyruvic acid production; *Yarrowia lipolytica*; Thiamine requirements **39**, 1469

Mediator-less; Microbial fuel cell (MFC); Membrane-less; Wastewater treatment; Pt-coated graphite felt; Aeration **39**, 1007

Medium design; *Dictyostelium discoideum*; Axenic media; Synthetic medium; Batch cultivation; Shake-flask cultivation **39**, 925

Medium optimization; Dextran dextrinase; *Gluconobacter oxydans*; Central composite design **39**, 1299

Melanin; *Fonsecaea pedrosoi*; Nitrogen source; Tricyclazole; Fungal mass; Chromoblastomycosis **39**, 633

Melanoidin; Decolorization; Molasses wastewater; Yeast; *Citeromyces* sp **39**, 917

Membrane bioreactor; Cheese whey; Jet loop reactor; Membrane filtration **39**, 2283

Membrane bioreactor; Membrane filtration; Wastewater treatment; Membrane fouling; Hydrodynamics; Critical flux **39**, 157

Membrane bioreactor; Membrane separation; Sequencing batch reactor; Membrane sequencing batch reactor; Dairy industry wastewater **39**, 221

Membrane filtration; Cheese whey; Jet loop reactor; Membrane bioreactor **39**, 2283

Membrane filtration; Membrane bioreactor; Wastewater treatment; Membrane fouling; Hydrodynamics; Critical flux **39**, 157

Membrane fouling; Membrane bioreactor; Membrane filtration; Wastewater treatment; Hydrodynamics; Critical flux **39**, 157

Membrane reactor; *Candida rugosa*; Immobilized lipase; Cuprophane hollow fibre; Palm oil hydrolysis; Reactor operating regime **39**, 1377

Membrane separation; Sequencing batch reactor; Membrane bioreactor; Membrane sequencing batch reactor; Dairy industry wastewater **39**, 221

Membrane sequencing batch reactor; Membrane separation; Sequencing batch reactor; Membrane bioreactor; Dairy industry wastewater **39**, 221

Membrane-less; Microbial fuel cell (MFC); Mediator-less; Wastewater treatment; Pt-coated graphite felt; Aeration **39**, 1007

Mesophilic anaerobic digestion; Fluidised-bed reactor; Wastewater; Protein isolates; Chickpea flour **39**, 1913

Metabolic modeling; Starch bioconversion; Fermentation; Flux analysis; *Saccharomyces cerevisiae*; Stressed cells **39**, 2097

Metabolism; Theoretical and experimental quantum yield; *Rhodobacter capsulatus*; Anoxygenic phototrophic bacteria; Bioenergetic; Photosynthesis; Culture growth; Mathematical model **39**, 939

Metabolites production; *Geotrichum candidum*; *Penicillium camembertii*; Batch cultures; Carbon and nitrogen yields **39**, 1449

Metal ions; Gentamicin; Peptidoglycan; *Micromonospora echinospora* **39**, 1145

Metal toxicity; *Thiobacillus thiooxidans*; Dose–response curve; Probit model; Sulphur oxidation **39**, 735

Metal; Modified rice husk; Sorption; Wastewater **39**, 437

Metal-polluted soils; Biosorption; Cadmium; Chromate; Bacterial strains **39**, 909

Methanogenesis; Gas-lift reactor; Hydrogen; Sludge retention time; Sulphate reduction; Homoacetogenesis **39**, 491

L-Methionine; Spent brewer's yeast cell; Biotransformation; *S*-Adenosyl-L-methionine (AdoMet); γ-L-Glutamyl-L-cysteinyl-glycine (GSH) **39**, 1993

Methyl jasmonate; *Beta vulgaris*; Hairy roots; Bubble column reactor; Polyamines; Pigment release; CTAB **39**, 2091

Methylphosphonate; *Escherichia coli*; Biodegradation; CP lyase **39**, 1063

Micelle; Paclitaxel; Plant cell culture; Precipitation; Prepurification **39**, 1567

Microbial activity; Aerobic granule; SBR; Settling time; Selection pressure; Cell polysaccharides; Cell hydrophobicity **39**, 579

Microbial biosensor; *Pseudomonas putida*; Screen printed graphite electrode; Phenolic compounds **39**, 1325

Microbial fuel cell (MFC); Membrane-less; Mediator-less; Wastewater treatment; Pt-coated graphite felt; Aeration **39**, 1007

Microbial screening; Biotransformation; Peroxidase; Oxidation; Isosafrol; Piperonal **39**, 2269

Microbial succession; Thermophilic composting; Manure; Quinone profile; Community structure; Physico-chemical properties **39**, 1999

Microbial; Phthalate esters; Biodegradation; Kinetics; *Pseudomonas fluoresences* FS1 **39**, 1125

Micromonospora echinospora; Gentamicin; Peptidoglycan; Metal ions **39**, 1145

Microscopic observation; Aerobic granular sludge; SBR; Selective pressure; Granulation **39**, 557

Microwave assisted drying; Forced convection drying; Soybean; Trypsin inhibitor; Unsaturated fatty acids **39**, 483

Microwave treatment; Heat shock; Antioxidant activity; L-DOPA; *Vicia faba*; Parkinson's diet **39**, 1775

Milling; Malt; Mashing; Starch hydrolysis; Wort; Brewing **39**, 2213

Mitochondrial glycerol-3-phosphate dehydrogenase (mtGPD); *Candida krusei*; Oxygen limitation; Glycerol fermentation; Cytosolic glycerol-3-phosphate dehydrogenase (ctGPD); Glycerol-3-phosphatase (GPP) **39**, 1899

Mixed bacterial culture; Batch denitrifying reactor; Continuous-flow stirred reactor; Denitrification; Nitrite accumulation; Kinetic analysis **39**, 95

Mixed culture; Acetic acid; Acidogens; Bioconversion; Selective maximization; Response surface methodology **39**, 1131

Mixed microbial culture; Fermentative bioconversion; Horizontal rotating tubular bioreactor (HRTB); Bioreactor potential use; Bioreactor comparison **39**, 995

Mixed organic acids; PHAs; *Ralstonia eutropha*; Continuous feeding **39**, 387

Mixotrophic culture; *Chlorella zofingiensis*; Astaxanthin; Glucose; Nitrate **39**, 1761

MnP; Solid state fermentation; Immobilized *Phanerochaete chrysosporium*; Purification; Characterization **39**, 2061

Modeling; Immobilised enzyme; Diffusional restrictions; Kinetic models; Effectiveness factor **39**, 393

Modeling; Biofiltration; Trickle-bed air biofilter; Isopropyl alcohol; Acetone; Sensitivity analysis; Performance equation **39**, 1849

Modeling; Size-exclusion chromatography; Whey proteins; Aqueous two-phase systems **39**, 1751

Modified enzyme; α-Chymotrypsin; Cyclodextrin; Enzyme thermostability; Supramolecular interaction **39**, 535

Modified rice husk; Metal; Sorption; Wastewater **39**, 437

Moisture content; Food waste composting; Fed-batch operation; Water extractable TOC; Composting rate **39**, 1183

Moisture; Probiotic bacteria; Freeze-drying; Protection; Trehalose; Storage **39**, 1081

Moisture; Sorghum; Steeping; Germination; Carboxypeptidase; Proteinase **39**, 711

Molasses wastewater; Decolorization; Melanoidin; Yeast; *Citeromyces* sp **39**, 917

Molasses; Xanthan gum; Biomass; *X. campestris*; Fermentation **39**, 249

Molecular weight; *Antrodia camphorata*; Exopolysaccharide; Submerged fermentation; Two-stage pH process; pH **39**, 931

monitoring; Activity; Biotransformation; Fungi; Oxygen uptake rate; Process-monitoring; Terpene **39**, 2221

Monitoring; Solid-state cultivation (SSC); Estimation; Secondary metabolite; Filtering **39**, 1701

Mono-azo dye; *Chlorella vulgaris*; Treatment; Toxicity; Acclimation **39**, 623

Morphology; *Streptomyces*; Continuous process; Antibiotic; Retamycin **39**, 2249

Moving bed biofilm reactor; Phenolic wastes; Shock load; Toxic waste; Phenol biodegradability; Inhibition **39**, 1177

Mucor circinelloides; Cellulase; Endoglucanase; Cellulose; Carboxymethyl cellulose; Carboxymethyl cellulase **39**, 1871

Multiple steady states; Sucrose; Hydrolysis; Invertase; CSTR; Reactor **39**, 2179

Mung bean (*Vigna radiata*); Antimicrobials; Antioxidants; PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; Sports; phytochenucals; peptides; phenolics; antioxidants; Helicobacter phlori **39**, 637

Municipal solid waste; Bioreactor; Leachate recirculation; Leachate recirculation rate **39**, 2157

Mutan hydrolysis; Mutanase; Dextranase; Synergistic effects; Digestion products; Streptococcal films **39**, 1481

Mutanase; Mutan hydrolysis; Dextranase; Synergistic effects; Digestion products; Streptococcal films **39**, 1481

Mutant *CW-15* without a cell wall; *Chlamydomonas reinhardtii*; Transformation; Gene *hpt* – hygromycin phosphotransferase; Electroporation **39**, 1685

Mutant; Central composite rotatable design; Polyhydroxyalkanoate; *Rhizobium meliloti*; Response surface methodology; Nutrient limitation **39**, 1977

Mutation; Lipase; *Candida* sp; Fermentation **39**, 459

Mytilus; Adhesive plaque protein; Cloning; Sequencing **39**, 659

Nanoparticles; Adsorption; Bromelain; Magnetic; Polyacrylic acid **39**, 2207

Naphthalene degradation; Arsenite; Plasmid; Soil model system **39**, 1305

Naphthalene; Bioluminescence; On-line detection; *Ps. fluorescens* HK44 **39**, 1217

Native-PAGE; *Aspergillus ficuum*; Inulinase; Exoinulinase; Endoinulinase; Production; Separation **39**, 5

Neomycin; Solid state fermentation; Wheat rawa; *Streptomyces marinensis* **39**, 529

Neomycin; *Streptomyces marinensis* NUV-5; Continuous fermentation; Airlift reactor **39**, 1407

Nickel; Biosorption; Immobilization; Algal cells; Isotherms **39**, 1767

Nitrate; *Chlorella zofingiensis*; Astaxanthin; Glucose; Mixotrophic culture **39**, 1761

Nitrification rate; Biological nitrogen removal process; High-strength ammonium industrial wastewater; Influent COD/N ratio **39**, 2035

Nitrification; Adsorption; Ammoniacal-nitrogen; Leachate; Reed bed; Wastewater treatment **39**, 1971

Nitrification; Ammonia oxidation; Free ammonia; Nitrite accumulation; Nitrite; Kinetics **39**, 1223

Nitrification; Backwashing; Biofilter; BOD removal; Floating media; Upflow; Volumetric loading **39**, 765

Nitrification; Carrier; Zeolite; Activated carbon; Activated sludge; C/N ratio; Adsorption capacity **39**, 211

Nitrification; Constructed wetland; Recirculation; Aeration; Wastewater **39**, 351

Nitrification; Inhibition; Fluoride; Activated sludge; Frost glass **39**, 73

Nitrification; Kinetic parameters; Substrate inhibition; Suspended and immobilised biomasses; Wastewater treatment **39**, 1159

Nitrification; Nitrogen removal; Denitrification; Internal recycle; A^2/O process **39**, 1615

Nitrite accumulation; Ammonia oxidation; Free ammonia; Nitrification; Nitrite; Kinetics **39**, 1223

Nitrite accumulation; Batch denitrifying reactor; Continuous-flow stirred reactor; Denitrification; Mixed bacterial culture; Kinetic analysis **39**, 95

Nitrite; Ammonia oxidation; Free ammonia; Nitrification; Nitrite accumulation; Kinetics **39**, 1223

Nitrogen removal; Nitrification; Denitrification; Internal recycle; A^2/O process **39**, 1615

Nitrogen source; *Fonsecaea pedrosoi*; Melanin; Tricyclazole; Fungal mass; Chromoblastomycosis **39**, 633

Nitrous oxide; Sulphur; Denitrification; Fluidized bed reactor; Loading rate **39**, 1591

***Nocardiopsis* sp**; Alkaline protease; Production; Characterization; Purification; Proteases **39**, 67

Non-biodegradable compounds; Submerged membrane bioreactor; Whey treatment; Biomass viability **39**, 1631

Non-growth conditions; Gluconic acid; Fermentation; Dissolved oxygen; Growth **39**, 1341

Nutrient feeding; Paclitaxel; *Taxus chinensis*; Elicitor; Precursor; Response–surface methodology **39**, 1073

Nutrient limitation; Central composite rotatable design; Polyhydroxyalkanoate; *Rhizobium meliloti*; Response surface methodology; Mutant **39**, 1977

Nutrient removal; Phenol inhibition; Sequencing batch reactor (SBR) **39**, 2123

Nutritional factors; White-rot fungi; Laccase; Inducers; Decolorization **39**, 1415

Nutritional functionality; Soybean; Glucosidase; Amylase; Glucuronidase; Peroxidase; Phenolic aglycones; Antioxidant **39**, 1785

***O*-butyrylchitosan**; Surface modification; Radiation grafting; Poly(vinyl chloride); Blood compatibility; Platelet adhesion **39**, 1151

Oil and grease; Vegetable oil; Residual inert COD; Physicochemical treatment; Dissolved air floatation **39**, 869

Oil extraction by pressing; *Guevina avellana mol*; Enzymic oil extraction; Mechanical oil extraction; Enzyme oil assisted process; Pharmaceuticals oil **39**, 51

Oleic acid; Lipase; Erythritol; Condensation; Lauric acid; Packed-bed reactor **39**, 681

Oligo-saccharides; Thermostable α-galactosidase; *Bacillus stearothermophilus*; Soybeans; Soymilk hydrolysis; Flatulence **39**, 1723

Olive mill wastewater; Anaerobic treatment; OLR; Polyphenol; UASB **39**, 1947

Olive Mill Wastewaters; Phenolic compounds; *Lactobacillus plantarum*; Reductive decolorization **39**, 59

Olive oil; Phenolic compounds; *Lactobacillus plantarum*; Depolymerisation **39**, 841

OLR; Olive mill wastewater; Anaerobic treatment; Polyphenol; UASB **39**, 1947

On-line detection; Bioluminescence; Naphthalene; *Ps. fluorescens* HK44 **39**, 1217

Operating indices; Food waste composting; Fed-batch operation; Exhaust gas condensate; Estimation of NH_3 evolution **39**, 1047

Operating variables; Palm oil; Hydrolysis rate; Lipase; Stirred bio-reactor **39**, 13

Optimisation; Poly (β-hydroxybutyrate) (PHB); *Ralstonia eutropha*; Fed-batch; MATLAB **39**, 963

Optimization; Antibiotic; *Streptomyces coelicolor*; Response surface methodology **39**, 1057

Optimization; Antimicrobial peptide; Human β-defensin-2; Soluble protein **39**, 2199

Optimization; *Bacillus*; Polychaeta; Alkaline protease; Soybean meal **39**, 1441

Optimization; *Candida* sp; Taguchi method; Xylitol production **39**, 951

Optimization; Cephalosporin C; *Acremonium chrysogenum* ATCC 48272; Solid state fermentation; Wheat rawa **39**, 171

Optimization; Differential Evolution; Fermentation **39**, 1709

Optimization; Extracellular protease; *Pseudomonas* sp; Response surface methodology; Central composite design; Artificial neural network; Radial basis function **39**, 2193

Optimization; Interferon-α2a; Fed-batch culture; Recombinant yeast: *Saccharomyces cerevisiae* **39**, 2069

Oregano extract; Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; Sports; phytochenucals; peptides; phenolics; antioxidants; Helicobacter phlori **39**, 637

Organic cosolvent; Penicillin acylase; Cephalexin; β-Lactam antibiotics; Enzymatic synthesis **39**, 111

Organic solid waste treatment; Solid state fermentation; Submerged fermentation; Hybrid system; Biodegradation **39**, 37

Organic solvent; Permeabilization; Penicillin G acylase; Dielectric constant; Hydrophobicity; Recombinant; *E.coli* **39**, 301

Organic–aqueous two-phase; *Candida rugosa*; Lipase; Enzyme activity; Hydrolytic reaction; Surfactant **39**, 233

Orthogonal layout; *Cordyceps pruinosa*; Polysaccharide; Submerged culture **39**, 2241

Osmophilic yeast; Glycerol production; *Saccharomyces cerevisiae*; Fermentation; Growth kinetics; Wine **39**, 1285

Osmotic pressure; Cell apoptosis; Cell cycle; Recombinant BHK cell; Cell culture **39**, 1817

Osmotic stress; β-Glucanase; Recombinant; *E. coli* **39**, 307

Overproduction; *Aspergillus niger*; Invertase; Parasexual cycle; Solid fermentation; Water activity; Enzymatic yields **39**, 2085

Oxidation; Microbial screening; Biotransformation; Peroxidase; Isosafrol; Piperonal **39**, 2269

Oxygen limitation; *Candida krusei*; Glycerol fermentation; Cytosolic glycerol-3-phosphate dehydrogenase (ctGPD); Glycerol-3-phosphatase (GPP); Mitochondrial glycerol-3-phosphate dehydrogenase (mtGPD) **39**, 1899

Oxygen uptake rate; Activity; Biotransformation; Fungi; Process-monitoring; monitoring; Terpene **39**, 2221

Ozonation; Chlorination; Electrochemical; Free radical; Scanning electron microscopy (SEM); Wastewater disinfection **39**, 1421

Pachysolen tannophilus; D-Xylose; Fermentation; Temperature; Ethanol; Xylitol **39**, 673

Packed bed column; Biosorption; Phenol; Immobilized activated sludge; Breakthrough curve **39**, 599

Packed-bed bioreactor; Biooxidation; Ferrous iron; Immobilization; Poly(-vinyl alcohol); *Acidithiobacillus ferrooxidans* **39**, 2129

Packed-bed reactor; Lipase; Erythritol; Condensation; Lauric acid; Oleic acid **39**, 681

Paclitaxel; Plant cell culture; Adsorbent treatment; Precipitation; Purification **39**, 1985

Paclitaxel; Plant cell culture; Micelle; Precipitation; Prepurification **39**, 1567

Paclitaxel; *Taxus chinensis*; Elicitor; Precursor; Response–surface methodology; Nutrient feeding **39**, 1073

***Paecilomyces* sp**; Adsorbable organic halogens; Colour; Kraft effluent; Lignin; *Pseudomonas aeruginosa*; Sequential bioreactor **39**, 1693

Palm oil hydrolysis; *Candida rugosa*; Immobilized lipase; Cuprophane hollow fibre; Membrane reactor; Reactor operating regime **39**, 1377

Palm oil; Hydrolysis rate; Lipase; Operating variables; Stirred bio-reactor **39**, 13

Pancreas; Carboxypeptidase; Sucrose; Stabilisation; Proteases **39**, 615

Parametric classification; Enzymes; Inhibition; Activation; Correction of slope coordinates of activation **39**, 805

Paraoxon; Butyrylcholinesterase; Purification; Parathion; Stabilization **39**, 877

Parasexual cycle; *Aspergillus niger*; Invertase; Overproduction; Solid fermentation; Water activity; Enzymatic yields **39**, 2085

Parathion; Butyrylcholinesterase; Purification; Paraoxon; Stabilization **39**, 877

Parkinson's diet; Heat shock; Microwave treatment; Antioxidant activity; L-DOPA; *Vicia faba* **39**, 1775

Pb (II); Bioaccumulation; Cd (II); Cu (II); Viable *R. arrhizus* **39**, 105

Peacilomyces cla isporus 2A.UMIDA.1; Endopolygalacturonase; Pectinolytic activity **39**, 455

Peat; H_2S; Biofiltration; *Thiobacillus thioparus*; Hydrogen sulphide **39**, 165

Pectic enzyme; Polysulphone; Hollow-fibre membranes; IMAC; Fractionation **39**, 1017

Pectin; Immobilisation; Elicitation; Chitosan; Stress metabolism; *Cruciata glabra*; *Vitis vinifera* **39**, 1369

Pectinolytic activity; *Peacilomyces cla isporus* 2A.UMIDA.1; Endopolygalacturonase **39**, 455

Penicillin acylase; Cephalexin; β-Lactam antibiotics; Enzymatic synthesis; Organic cosolvent **39**, 111

Penicillin G acylase; Organic solvent; Permeabilization; Dielectric constant; Hydrophobicity; Recombinant; *E.coli* **39**, 301

Penicillium camembertii; *Geotrichum candidum*; Batch cultures; Carbon and nitrogen yields; Metabolites production **39**, 1449

Penicillium camembertii; Lipase; Purification; Esterification; Acetate hexanoate **39**, 1495

Penicillium decumbens; Solid-state culture; Pressure oscillation coupled with forced aeration; Cellulase production **39**, 1293

***Penicillium* sp**; Alkaline protease; Solid substrate fermentation; Soy protein hydrolysis **39**, 977

***Penicillium* sp**; *Fusarium* sp; *Aspergillus* sp; *Graphium* sp; Biodegradation; Phenol **39**, 1001

Pentachlorophenol; UASB; Granulation; Granule; Reductive dechlorination; Acclimation **39**, 1249

Peptides; Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; Sports; phytochenucals; phenolics; antioxidants; Helicobacter phlori **39**, 637

Peptidoglycan; Gentamicin; Metal ions; *Micromonospora echinospora* **39**, 1145

Performance equation; Modeling; Biofiltration; Trickle-bed air biofilter; Isopropyl alcohol; Acetone; Sensitivity analysis **39**, 1849

Permeabilization; Organic solvent; Penicillin G acylase; Dielectric constant; Hydrophobicity; Recombinant; *E.coli* **39**, 301

Peroxidase inactivation; Horseradish peroxidase; Immobilization; Cinnamic carbohydrate esters; Enzyme kinetics; Peroxidase stability **39**, 1455

Peroxidase stability; Horseradish peroxidase; Immobilization; Cinnamic carbohydrate esters; Enzyme kinetics; Peroxidase inactivation **39**, 1455

Peroxidase; Microbial screening; Biotransformation; Oxidation; Isosafrol; Piperonal **39**, 2269

Peroxidase; Soybean; Glucosidase; Amylase; Glucuronidase; Phenolic aglycones; Antioxidant; Nutritional functionality **39**, 1785

PET-PANI composite; Immobilisation; Horseradish peroxidase; Stability; Reuse; Kinetic parameters **39**, 883

pH; *Antrodia camphorata*; Exopolysaccharide; Submerged fermentation; Two-stage pH process; Molecular weight **39**, 931

pH; Volatile fatty acids; Anaerobic; Hybrid **39**, 1491

pH; Xylanase; Cellulase; Lactose; *Trichoderma reesei*; Filamentous fungi **39**, 729

Phanerochaete chrysosporium; Chlorophenols; Adsorption; Desorption; Wastewater **39**, 2025

Phanerochaete sordida; Decolorization; Dyestuff; Rotating biological contactor **39**, 1401

Pharmaceuticals oil; *Guevina avellana mol*; Enzymic oil extraction; Oil extraction by pressing; Mechanical oil extraction; Enzyme oil assisted process **39**, 51

PHAs; *Ralstonia eutropha*; Mixed organic acids; Continuous feeding **39**, 387

Phennolic aglycone; Cranberry pomace; Ellagic acid; *Lentinus edodes*; Phenolics; Antioxidant activity; β-Glucosidase; 1,1-Diphenyl-2-picrylhydrazyl radical (DPPH) inhibition system; β-Carotene oxidation model system **39**, 367

Phenol biodegradability; Moving bed biofilm reactor; Phenolic wastes; Shock load; Toxic waste; Inhibition **39**, 1177

Phenol inhibition; Nutrient removal; Sequencing batch reactor (SBR) **39**, 2123

Phenol Red; Airlift bioreactor; Characterisation; Laccase; Stability; *Trametes versicolor* **39**, 467

Phenol Red; Degradation; Laccase; Polymerisation; Redox mediator **39**, 1803

Phenol; Benzene; Biodegradation; Interaction; *Pseudomonas putida* F1; Toluene **39**, 983

Phenol; Benzene; Toluene; Biodegradation; Substrate interaction; *Pseudomonas putida* F1 **39**, 27

Phenol; Biosorption; Immobilized activated sludge; Packed bed column; Breakthrough curve **39**, 599

Phenol; *Fusarium* sp; *Aspergillus* sp; *Penicillium* sp; *Graphium* sp; Biodegradation **39**, 1001

Phenolic aglycones; Soybean; Glucosidase; Amylase; Glucuronidase; Peroxidase; Antioxidant; Nutritional functionality **39**, 1785

Phenolic antioxidants; Antioxidant response; Environmental applications; Human health; Proline-linked oxidative phosphorylation; Phytochemicals; Proline-linked pentose phosphate pathway **39**, 789

Phenolic antioxidants; Pineapple residue; Soy; *Rhizopus oligosporus*; Solid-state bioconversion; β-Glucosidase **39**, 2167

Phenolic compounds; Inhibition; Kinetics; Anaerobic digestion; Two-phase olive mill effluents (TPOME) **39**, 425

Phenolic compounds; *Lactobacillus plantarum*; Olive Mill Wastewaters; Reductive decolorization **39**, 59

Phenolic compounds; Microbial biosensor; *Pseudomonas putida*; Screen printed graphite electrode **39**, 1325

Phenolic compounds; Olive oil; *Lactobacillus plantarum*; Depolymerisation **39**, 841

Phenolic compounds; Table olive wastewater; *Aspergillus niger*; Biological treatment; Fenton's reagent; Hydrogen peroxide **39**, 1653

Phenolic wastes; Moving bed biofilm reactor; Shock load; Toxic waste; Phenol biodegradability; Inhibition **39**, 1177

Phenolics; Cranberry pomace; Ellagic acid; *Lentinus edodes*; Phennolic aglycone; Antioxidant activity; β-Glucosidase; 1,1-Diphenyl-2-picrylhydrazyl radical (DPPH) inhibition system; β-Carotene oxidation model system **39**, 367

Phenolics; Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; Sports; phytochenucals; peptides; antioxidants; Helicobacter phlori **39**, 637

Phenoloxidase; Laccase; *Pleurotus pulmonarius*; Solid-state fermentation; Dye decolourisation **39**, 855

Phenylacetaldehyde; *Acetobacter aceti*; Immobilized cells; 2-Phenyl-l-ethanol; Phenylacetic acid; Flavours **39**, 747

Phenylacetic acid; *Acetobacter aceti*; Immobilized cells; 2-Phenyl-l-ethanol; Phenylacetaldehyde; Flavours **39**, 747

2-Phenyl-l-ethanol; *Acetobacter aceti*; Immobilized cells; Phenylacetic acid; Phenylacetaldehyde; Flavours **39**, 747

Phosphate overplus; Polyphosphate; Exopolyphosphatase; Substrate specificity; Cytosol; Culture conditions; *Saccharomyces cerevisiae* **39**, 1625

Phosphorus removal; MBR; Ultrasound; Excess sludge; Biological treatment **39**, 1923

Photocatalytic inactivation; *Escherichia coli*; *Lactobacillus helveticus*; TiO_2; UV; ZnO **39**, 475

Photographic wastewater; Chitin; Adsorption; Silver-thiosulphate complexes **39**, 1553

Photosynthesis; Theoretical and experimental quantum yield; *Rhodobacter capsulatus*; Anoxygenic phototrophic bacteria; Metabolism; Bioenergetic; Culture growth; Mathematical model **39**, 939

Phthalate ester; Activated sludge; Acclimation; Biodegradation; Priority pollutant; Inhibition **39**, 1831

Phthalate esters; Microbial; Biodegradation; Kinetics; *Pseudomonas fluoresences* FS1 **39**, 1125

Phthalic acid esters; Biodegradation; Kinetics; Priority pollutant; Bioremediation; Bioaugmentation **39**, 1837

Phycocyanin; *Calothrix* sp; Cyanobacteria; Lysozyme; Extraction; Purification **39**, 2047

Physico-chemical properties; Thermophilic composting; Manure; Quinone profile; Microbial succession; Community structure **39**, 1999

Physicochemical treatment; Vegetable oil; Residual inert COD; Dissolved air floatation; Oil and grease **39**, 869

Physiology; Immobilization; Glucose; Citric acid; *Aspergillus niger* **39**, 1963

Phytochemicals; Antioxidant response; Environmental applications; Human health; Proline-linked oxidative phosphorylation; Phenolic antioxidants; Proline-linked pentose phosphate pathway **39**, 789

Phytochenucals; Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; Sports; peptides; phenolics; antioxidants; Helicobacter phlori **39**, 637

Pigment release; *Beta vulgaris*; Hairy roots; Bubble column reactor; Polyamines; Methyl jasmonate; CTAB **39**, 2091

Pineapple residue; Phenolic antioxidants; Soy; *Rhizopus oligosporus*; Solid-state bioconversion; β-Glucosidase **39**, 2167

Piperonal; Microbial screening; Biotransformation; Peroxidase; Oxidation; Isosafrol **39**, 2269

Plackett–Burman design; *Bacillus* sp; Alkaline protease; Detergent; FCCCD; Response surface methodology; Repression; Economy **39**, 2115

Plackett–Burman design; Competitive binding; RSM plots; Alcohol binding; Esterification behaviour; Lipase; Acid binding; Thermal stability; Selection of alcohol or acid **39**, 847

Plant cell culture; Paclitaxel; Adsorbent treatment; Precipitation; Purification **39**, 1985

Plant cell culture; Paclitaxel; Micelle; Precipitation; Prepurification **39**, 1567

Plant-specific valuable metabolite production; *Artemisia annua* L; Shoot culture; Growth; Artemisinin biosynthesis; Bioreactor **39**, 45

Plasmid; Arsenite; Naphthalene degradation; Soil model system **39**, 1305

Platelet adhesion; Surface modification; Radiation grafting; *O*-butyrylchitosan; Poly(vinyl chloride); Blood compatibility **39**, 1151

Pleurotus ostreatus; Xylanase; SYJ042; Submerge; Cultural conditions; Properties **39**, 1561

Pleurotus pulmonarius; Laccase; Phenoloxidase; Solid-state fermentation; Dye decolourisation **39**, 855

Polarography; Activated sludge; Complexation; Extracellular polymers; Heavy metal **39**, 833

Poly (β-hydroxybutyrate) (PHB); *Ralstonia eutropha*; Fed-batch; Optimisation; MATLAB **39**, 963

Poly(hydroxyalkanoates); Acidification; Fermentation; VFA **39**, 295

Poly(vinyl alcohol); Biooxidation; Ferrous iron; Immobilization; Packed-bed bioreactor; *Acidithiobacillus ferrooxidans* **39**, 2129

Poly(vinyl chloride); Surface modification; Radiation grafting; *O*-butyrylchitosan; Blood compatibility; Platelet adhesion **39**, 1151

Polyacrylamide; Lipase; Production; *Aspergillus niger*; Immobilization; Alginate; κ-Carrageenan **39**, 525

Polyacrylic acid; Adsorption; Bromelain; Magnetic; Nanoparticles **39**, 2207

Polyamines; *Beta vulgaris*; Hairy roots; Bubble column reactor; Methyl jasmonate; Pigment release; CTAB **39**, 2091

Polyaniline; Horseradish peroxidase; Immobilisation; Stability; Kinetic parameters **39**, 957

Polychaeta; *Bacillus*; Alkaline protease; Soybean meal; Optimization **39**, 1441

Polycyclic aromatic hydrocarbons; Remediation; Process; Vegetable oil; Extractant **39**, 1211

Polyhydroxyalkanoate; Central composite rotatable design; *Rhizobium meliloti*; Response surface methodology; Mutant; Nutrient limitation **39**, 1977

Polymer microbeads; Suspension polymerisation; Immobilisation; Tyrosinase; Enzyme reactor **39**, 2007

Polymerisation; Degradation; Laccase; Phenol Red; Redox mediator **39**, 1803

Polyphenol; Olive mill wastewater; Anaerobic treatment; OLR; UASB **39**, 1947

Polyphenols/tannins; Maize; Steeping; Malting; Enzyme development **39**, 1013

Polyphenols; Cacao bean husk; *Theobroma cacao*; Glucosyltransferase; Anticaries **39**, 2043

Polyphosphate; Exopolyphosphatase; Substrate specificity; Phosphate overplus; Cytosol; Culture conditions; *Saccharomyces cerevisiae* **39**, 1625

Polysaccharide; *Cordyceps pruinosa*; Submerged culture; Orthogonal layout **39**, 2241

Polysulphone; Hollow-fibre membranes; IMAC; Pectic enzyme; Fractionation **39**, 1017

Polyurethane foam; Immobilization; *Acetobacter aceti*; Acetic acid fermentation; Siran; Wood chips **39**, 547

Poultry fat; Beef tallow; Biomass support particle (BSP); Lipase; *Rhizomucor miehei*; *Yarrowia lipolytica* **39**, 1347

PPP (pentose phosphate pathway); Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; Sports; phytochenucals; peptides; phenolics; antioxidants; Helicobacter phlori **39**, 637

Precipitation; Paclitaxel; Plant cell culture; Micelle; Prepurification **39**, 1567

Precipitation; Plant cell culture; Paclitaxel; Adsorbent treatment; Purification **39**, 1985

Precursor; Paclitaxel; *Taxus chinensis*; Elicitor; Response–surface methodology; Nutrient feeding **39**, 1073

Prepurification; Paclitaxel; Plant cell culture; Micelle; Precipitation **39**, 1567

Pressure oscillation coupled with forced aeration; Solid-state culture; Cellulase production; *Penicillium decumbens* **39**, 1293

Priority pollutant; Phthalate ester; Activated sludge; Acclimation; Biodegradation; Inhibition **39**, 1831

Priority pollutant; Phthalic acid esters; Biodegradation; Kinetics; Bioremediation; Bioaugmentation **39**, 1837

Probiotic bacteria; Freeze-drying; Protection; Trehalose; Storage; Moisture **39**, 1081

Probit model; *Thiobacillus thiooxidans*; Dose–response curve; Metal toxicity; Sulphur oxidation **39**, 735

Process variables; Corn starch hydrolysis; α-Amylase inactivation; Mathematical modelling; Stirred batch bioreactor **39**, 1877

Process; Recovery; Ion exchange; Isolate; Lactalbumin **39**, 1737

Process; Remediation; Vegetable oil; Extractant; Polycyclic aromatic hydrocarbons **39**, 1211

Processing time; Corn, rice and wheat starch hydrolysis; α-Amylase; Inactivation; Temperature; Mathematical modelling; Stirred batch bioreactor **39**, 1137

Process-monitoring; Activity; Biotransformation; Fungi; Oxygen uptake rate; monitoring; Terpene **39**, 2221

Production; *N*-Acetyl-β-D-glucosaminidase; *Fusarium oxysporum*; Solid-state fermentation; Purification **39**, 1599

Production; Alkaline protease; Characterization; Purification; *Nocardiopsis* sp; Proteases **39**, 67

Production; α-Amylase; *Bacillus subtilis*; Starch; Hydrolysis **39**, 1745

Production; *Aspergillus ficuum*; Inulinase; Exoinulinase; Endoinulinase; Native-PAGE; Separation **39**, 5

Production; Lipase; *Aspergillus niger*; Immobilization; Alginate; κ-Carrageenan; Polyacrylamide **39**, 525

Proline-linked oxidative phosphorylation; Antioxidant response; Environmental applications; Human health; Phenolic antioxidants; Phytochemicals; Proline-linked pentose phosphate pathway **39**, 789

Proline-linked pentose phosphate pathway; Antioxidant response; Environmental applications; Human health; Proline-linked oxidative phosphorylation; Phenolic antioxidants; Phytochemicals **39**, 789

Properties; Xylanase; *Pleurotus ostreatus*; SYJ042; Submerge; Cultural conditions **39**, 1561

β-Propiolactone homologs; β-Propiolactone; *+l*-Inducible effect of β-propiolactone homologs on enhancement of bactericidal action **39**, 1465

β-Propiolactone; β-Propiolactone homologs; *+l*-Inducible effect of β-propiolactone homologs on enhancement of bactericidal action **39**, 1465

Proteases; Alkaline protease; Production; Characterization; Purification; *Nocardiopsis* sp **39**, 67

Proteases; Pancreas; Carboxypeptidase; Sucrose; Stabilisation **39**, 615

Protection; Probiotic bacteria; Freeze-drying; Trehalose; Storage; Moisture **39**, 1081

Protein isolates; Mesophilic anaerobic digestion; Fluidised-bed reactor; Wastewater; Chickpea flour **39**, 1913

Protein purification; Enzyme immobilization; IMAC **39**, 1573

protein; Chromium; *Saccharomyces cerevisiae*; heavy metal; RNA/DNA ratio **39**, 1231

Proteinase; Sorghum; Steeping; Germination; Moisture; Carboxypeptidase **39**, 711

***Ps. fluorescens* HK44**; Bioluminescence; Naphthalene; On-line detection **39**, 1217

Pseudo second order; Aquatic plants; Biosorption; Heavy metals; Langmuir model **39**, 179

Pseudo-isotherm; Pseudo-second order; Kinetics; Equilibrium; Adsorption **39**, 759

Pseudomonas aeruginosa; Adsorbable organic halogens; Colour; Kraft effluent; Lignin; *Paecilomyces* sp; Sequential bioreactor **39**, 1693

Pseudomonas fluorescens; Anaerobic; Aerobic; Bioremediation; Selenium **39**, 1607

***Pseudomonas fluoresences* FS1**; Phthalate esters; Microbial; Biodegradation; Kinetics **39**, 1125

***Pseudomonas putida* F1**; Benzene; Biodegradation; Interaction; Phenol; Toluene **39**, 983

***Pseudomonas putida* F1**; Benzene; Toluene; Phenol; Biodegradation; Substrate interaction **39**, 27

Pseudomonas putida; Microbial biosensor; Screen printed graphite electrode; Phenolic compounds **39**, 1325

***Pseudomonas* sp**; Optimization; Extracellular protease; Response surface methodology; Central composite design; Artificial neural network; Radial basis function **39**, 2193

Pseudo-second order; Pseudo-isotherm; Kinetics; Equilibrium; Adsorption **39**, 759

Pt-coated graphite felt; Microbial fuel cell (MFC); Membrane-less; Mediator-less; Wastewater treatment; Aeration **39**, 1007

Pumice; *Dictyostelium discoideum*; Mass cultivation; Synthetic medium; Immobilization; Ceramic carrier **39**, 1859

Purification; *N*-Acetyl-β-D-glucosaminidase; Production; *Fusarium oxysporum*; Solid-state fermentation **39**, 1599

Purification; Alkaline protease; Production; Characterization; *Nocardiopsis* sp; Proteases **39**, 67

Purification; Butyrylcholinesterase; Parathion; Paraoxon; Stabilization **39**, 877

Purification; *Calothrix* sp; Cyanobacteria; Lysozyme; Phycocyanin; Extraction **39**, 2047

Purification; Lipase; *Aspergillus* **39**, 239

Purification; Lipase; *Penicillium camembertii*; Esterification; Acetate hexanoate **39**, 1495

Purification; Plant cell culture; Paclitaxel; Adsorbent treatment; Precipitation **39**, 1985

Purification; Solid state fermentation; Immobilized *Phanerochaete chrysosporium*; MnP; Characterization **39**, 2061

Pyruvate; Fusarium; Maltose; Glucose; Ascorbat; Antioxidant enzymes **39**, 1519

Pyruvic acid production; *Yarrowia lipolytica*; Thiamine requirements; Mechanism of pyruvic acid production **39**, 1469

Quince; Wine; Continuous fermentation; Immobilized cells; Yeast **39**, 143

Quinone profile; Thermophilic composting; Manure; Microbial succession; Community structure; Physico-chemical properties **39**, 1999

Radial basis function; Optimization; Extracellular protease; *Pseudomonas* sp; Response surface methodology; Central composite design; Artificial neural network **39**, 2193

Radiation grafting; Surface modification; *O*-butyrylchitosan; Poly(vinyl chloride); Blood compatibility; Platelet adhesion **39**, 1151

Ralstonia eutropha; PHAs; Mixed organic acids; Continuous feeding **39**, 387

Ralstonia eutropha; Poly (β-hydroxybutyrate) (PHB); Fed-batch; Optimisation; MATLAB **39**, 963

Reactive Brilliant Blue; Anaerobic decolorization; Co-metabolism; Anthraquinone dye **39**, 89

Reactor operating regime; *Candida rugosa*; Immobilized lipase; Cuprophane hollow fibre; Palm oil hydrolysis; Membrane reactor **39**, 1377

Reactor; Sucrose; Hydrolysis; Invertase; Multiple steady states; CSTR **39**, 2179

Recirculation; Constructed wetland; Aeration; Nitrification; Wastewater **39**, 351

Recombinant aldolases; Fuc-1-PA; Growth medium; IPTG induction; *E. coli* **39**, 1677

Recombinant BHK cell; Cell apoptosis; Cell cycle; Osmotic pressure; Cell culture **39**, 1817

Recombinant yeast: *Saccharomyces cerevisiae*; Interferon-α2a; Optimization; Fed-batch culture **39**, 2069

Recombinant yeast; *Saccharomyces cerevisiae*; Starch bioconversion; Compartment model; Characteristic time constant **39**, 1237

Recombinant; β-Glucanase; Osmotic stress; *E. coli* **39**, 307

Recombinant; Organic solvent; Permeabilization; Penicillin G acylase; Dielectric constant; Hydrophobicity; *E.coli* **39**, 301

Recovery; Ion exchange; Process; Isolate; Lactalbumin **39**, 1737

Redlich–Peterson; Chitosan; Acid dyes; Langmuir; Freundlich; Adsorption isotherms **39**, 693

Redox mediator; Degradation; Laccase; Phenol Red; Polymerisation **39**, 1803

Reductive dechlorination; UASB; Granulation; Pentachlorophenol; Granule; Acclimation **39**, 1249

Reductive decolorization; Phenolic compounds; *Lactobacillus plantarum*; Olive Mill Wastewaters **39**, 59

Reed bed; Adsorption; Ammoniacal-nitrogen; Leachate; Nitrification; Wastewater treatment **39**, 1971

Remediation; Process; Vegetable oil; Extractant; Polycyclic aromatic hydrocarbons **39**, 1211

Repeated batch fermentation; Alkaline protease production; Calcium alginate; Immobilized cells **39**, 1331

Repeated batch fermentation; *Candida krusei*; Glycerol; Glycerol production kinetics **39**, 1507

Repression; *Bacillus* sp; Alkaline protease; Detergent; Plackett–Burman design; FCCCD; Response surface methodology; Economy **39**, 2115

Residual inert COD; Vegetable oil; Physicochemical treatment; Dissolved air floatation; Oil and grease **39**, 869

Response surface methodology (RSM); Amino acid surfactants; Enzymatic synthesis; Lipase; Free fatty acids; L-Lysine **39**, 1511

Response surface methodology (RSM); Central composite rotatable design (CCRD); Enzymic synthesis; Esterification; Isoamyl butyrate, *Rhizopus* sp. lipase; *Geotrichum* sp. lipase **39**, 687

Response surface methodology; Acetic acid; Acidogens; Bioconversion; Mixed culture; Selective maximization **39**, 1131

Response surface methodology; Antibiotic; *Streptomyces coelicolor*; Optimization **39**, 1057

Response surface methodology; *Bacillus mojavensis*; Alkaline protease; Bioreactor **39**, 203

Response surface methodology; *Bacillus* sp; Alkaline protease; Detergent; Plackett–Burman design; FCCCD; Repression; Economy **39**, 2115

Response surface methodology; Central composite rotatable design; Polyhydroxyalkanoate; *Rhizobium meliloti*; Mutant; Nutrient limitation **39**, 1977

Response surface methodology; *Clostridium thermosulfurogenes*; Solid-state fermentation; *Thermostable* β-*amylase* **39**, 267

Response surface methodology; Optimization; Extracellular protease; *Pseudomonas* sp; Central composite design; Artificial neural network; Radial basis function **39**, 2193

Response surface methodology; Sulphuric acid; *Thiobacillus thiooxidans*; Central composite design **39**, 1953

Response–surface methodology; Paclitaxel; *Taxus chinensis*; Elicitor; Precursor; Nutrient feeding **39**, 1073

Resting cells; Carnitine; Biotransformation; Reuse cells; *Escherichia coli* **39**, 287

Retamycin; *Streptomyces*; Continuous process; Morphology; Antibiotic **39**, 2249

Reuse cells; Carnitine; Resting cells; Biotransformation; *Escherichia coli* **39**, 287

Reuse; Immobilisation; PET-PANI composite; Horseradish peroxidase; Stability; Kinetic parameters **39**, 883

Reutilization; Stillage grain; Ganoderma lucidum; Solid-state fermentation **39**, 21

Rheology; Activated sludge; Digestion; Bingham model **39**, 1793

Rhizobium meliloti; Central composite rotatable design; Polyhydroxyalkanoate; Response surface methodology; Mutant; Nutrient limitation **39**, 1977

Rhizomucor miehei; Beef tallow; Biomass support particle (BSP); Lipase; Poultry fat; *Yarrowia lipolytica* **39**, 1347

Rhizopus oligosporus; Phenolic antioxidants; Pineapple residue; Soy; Solid-state bioconversion; β-Glucosidase **39**, 2167

Rhizopus oligosporus; Solid-state bioprocessing; Antimicrobial activity; *Listeria monocytogenes*; *Vibrio parahaemolyticus*; *Escherichia coli 0157:H7* **39**, 1939

Rhodobacter capsulatus; Theoretical and experimental quantum yield; Anoxygenic phototrophic bacteria; Metabolism; Bioenergetic; Photosynthesis; Culture growth; Mathematical model **39**, 939

Rice straw hydrolysate; *Candida guilliermondii*; Detoxification; Bioreactor **39**, 1433

RNA/DNA ratio; Chromium; *Saccharomyces cerevisiae*; protein; heavy metal **39**, 1231

RNase *Th*; Gamma-irradiation; UV-spectra; Amino acid composition **39**, 2257

Rotating biological contactor; Decolorization; Dyestuff; *Phanerochaete sordida* **39**, 1401

RSM plots; Competitive binding; Alcohol binding; Esterification behaviour; Lipase; Acid binding; Thermal stability; Plackett–Burman design; Selection of alcohol or acid **39**, 847

Saccharomyces cererisiae; Bioprocess; Bioreactors; Fed-batch culture; Fermentation; Ergosterol **39**, 345

Saccharomyces cerevisiae; Chromium; protein; heavy metal; RNA/DNA ratio **39**, 1231

Saccharomyces cerevisiae; Glycerol production; Fermentation; Osmophilic yeast; Growth kinetics; Wine **39**, 1285

Saccharomyces cerevisiae; Polyphosphate; Exopolyphosphatase; Substrate specificity; Phosphate overplus; Cytosol; Culture conditions **39**, 1625

Saccharomyces cerevisiae; Recombinant yeast; Starch bioconversion; Compartment model; Characteristic time constant **39**, 1237

Saccharomyces cerevisiae; Starch bioconversion; Fermentation; Flux analysis; Metabolic modeling; Stressed cells **39**, 2097

SBR; Aerobic granular sludge; Selective pressure; Microscopic observation; Granulation **39**, 557

SBR; Aerobic granule; Settling time; Selection pressure; Cell polysaccharides; Cell hydrophobicity; Microbial activity **39**, 579

Scanning electron microscopy (SEM); Chlorination; Electrochemical; Free radical; Ozonation; Wastewater disinfection **39**, 1421

Screen printed graphite electrode; Microbial biosensor; *Pseudomonas putida*; Phenolic compounds **39**, 1325

Secondary metabolite; Solid-state cultivation (SSC); Monitoring; Estimation; Filtering **39**, 1701

Selection of alcohol or acid; Competitive binding; RSM plots; Alcohol binding; Esterification behaviour; Lipase; Acid binding; Thermal stability; Plackett–Burman design **39**, 847

Selection pressure; Aerobic granule; SBR; Settling time; Cell polysaccharides; Cell hydrophobicity; Microbial activity **39**, 579

Selective maximization; Acetic acid; Acidogens; Bioconversion; Mixed culture; Response surface methodology **39**, 1131

Selective pressure; Aerobic granular sludge; SBR; Microscopic observation; Granulation **39**, 557

Selenium; Anaerobic; Aerobic; Bioremediation; *Pseudomonas fluorescens* **39**, 1607

Sensitivity analysis; Modeling; Biofiltration; Trickle-bed air biofilter; Isopropyl alcohol; Acetone; Performance equation **39**, 1849

Sensory evaluation; Chitosan; Fruit juice; Clarification **39**, 2229

Separation; *Aspergillus ficuum*; Inulinase; Exoinulinase; Endoinulinase; Native-PAGE; Production **39**, 5

SE-poplar wood; Detoxification methods; SHF; SSF; Ethanol **39**, 1533

Sequencing batch reactor (SBR); Nutrient removal; Phenol inhibition **39**, 2123

Sequencing batch reactor; Biological nutrient removal; Specific organic loading rate **39**, 507
39, 513

Sequencing batch reactor; Membrane separation; Membrane bioreactor; Membrane sequencing batch reactor; Dairy industry wastewater **39**, 221

Sequencing; Mytilus; Adhesive plaque protein; Cloning **39**, 659

Sequential (anaerobic/aerobic) treatment; Distillery wastewater; Whisky; UASB **39**, 279

Sequential bioreactor; Adsorbable organic halogens; Colour; Kraft effluent; Lignin; *Paecilomyces* sp; *Pseudomonas aeruginosa* **39**, 1693

Serratia; Biosurfactant; Gasoline; Experimental design **39**, 2277

Settling time; Aerobic granule; SBR; Selection pressure; Cell polysaccharides; Cell hydrophobicity; Microbial activity **39**, 579

Shake-flask cultivation; *Dictyostelium discoideum*; Axenic media; Synthetic medium; Medium design; Batch cultivation **39**, 925

SHF; SE-poplar wood; Detoxification methods; SSF; Ethanol **39**, 1533

Shock load; Moving bed biofilm reactor; Phenolic wastes; Toxic waste; Phenol biodegradability; Inhibition **39**, 1177

Shoot culture; *Artemisia annua* L; Growth; Artemisinin biosynthesis; Bioreactor; Plant-specific valuable metabolite production **39**, 45

Shrimp wastes; *Verticillium lecanii*; Submerged fermentation; Solid state fermentation; Chitin; Chitinases; *N*-Acetylglucosamine; Entomopathogenic fungi **39**, 665

Silver-thiosulphate complexes; Chitin; Adsorption; Photographic wastewater **39**, 1553

Simultaneous saccharification and fermentation; Bioethanol; Lignocellulosic biomass; *Kluyveromyces marxianus* **39**, 1843

Siran; Immobilization; *Acetobacter aceti*; Acetic acid fermentation; Wood chips; Polyurethane foam **39**, 547

Size-exclusion chromatography; Whey proteins; Aqueous two-phase systems; Modeling **39**, 1751

Sludge retention time; Gas-lift reactor; Hydrogen; Sulphate reduction; Methanogenesis; Homoacetogenesis **39**, 491

Soil model system; Arsenite; Naphthalene degradation; Plasmid **39**, 1305

Solid fermentation; *Aspergillus niger*; Invertase; Overproduction; Parasexual cycle; Water activity; Enzymatic yields **39**, 2085

Solid phase method; Manure composting; Enzyme activities **39**, 971

Solid state fermentation; *Aspergillus*; *Bacillus*; α-Amylase; Glucoamylase; Starch hydrolysis; Thermostable **39**, 185

Solid state fermentation; *Bacillus*; Alkaline protease **39**, 1893

Solid state fermentation; Cephalosporin C; *Acremonium chrysogenum* ATCC 48272; Wheat rawa; Optimization **39**, 171

Solid state fermentation; Immobilized *Phanerochaete chrysosporium*; MnP; Purification; Characterization **39**, 2061

Solid state fermentation; Submerged fermentation; Organic solid waste treatment; Hybrid system; Biodegradation **39**, 37

Solid state fermentation; *Verticillium lecanii*; Submerged fermentation; Chitin; Chitinases; *N*-Acetylglucosamine; Shrimp wastes; Entomopathogenic fungi **39**, 665

Solid state fermentation; Wheat rawa; Neomycin; *Streptomyces marinensis* **39**, 529

Solid substrate fermentation; Alkaline protease; *Penicillium* sp; Soy protein hydrolysis **39**, 977

Solid substrate fermentation; Chitosan; Fungal mycelia; Sweet potato; Urea **39**, 1639

Solid-state bioconversion; Phenolic antioxidants; Pineapple residue; Soy; *Rhizopus oligosporus*; β-Glucosidase **39**, 2167

Solid-state bioprocessing; Antimicrobial activity; *Listeria monocytogenes*; *Vibrio parahaemolyticus*; *Escherichia coli 0157:H7*; *Rhizopus oligosporus* **39**, 1939

Solid-state cultivation (SSC); Monitoring; Estimation; Secondary metabolite; Filtering **39**, 1701

Solid-state culture; Pressure oscillation coupled with forced aeration; Cellulase production; *Penicillium decumbens* **39**, 1293

Solid-state fermentation; *N*-Acetyl-β-D-glucosaminidase; Production; *Fusarium oxysporum*; Purification **39**, 1599

Solid-state fermentation; Aeration; Sugar cane bagasse; *Thermoascus aurantiacus*; Xylanase **39**, 1387

Solid-state fermentation; Chitinase; *Trichoderma harzianum*; Antifungal activity **39**, 1583

Solid-state fermentation; *Clostridium thermosulfurogenes*; Response surface methodology; *Thermostable* β-*amylase* **39**, 267

Solid-state fermentation; Laccase; *Pleurotus pulmonarius*; Phenoloxidase; Dye decolourisation **39**, 855

Solid-state fermentation; Stillage grain; Ganoderma lucidum; Reutilization **39**, 21

Solubility; Angiotensin I converting enzyme; Flavourzyme; Corn gluten; Water sorption **39**, 989

Soluble protein; Antimicrobial peptide; Human β-defensin-2; Optimization **39**, 2199

Sorghum; Steeping; Germination; Moisture; Carboxypeptidase; Proteinase **39**, 711

Sorption; Modified rice husk; Metal; Wastewater **39**, 437

Soy protein hydrolysis; Alkaline protease; *Penicillium* sp; Solid substrate fermentation **39**, 977

Soy; Phenolic antioxidants; Pineapple residue; *Rhizopus oligosporus*; Solid-state bioconversion; β-Glucosidase **39**, 2167

Soybean meal; *Bacillus*; Polychaeta; Alkaline protease; Optimization **39**, 1441

Soybean; Forced convection drying; Microwave assisted drying; Trypsin inhibitor; Unsaturated fatty acids **39**, 483

Soybean; Glucosidase; Amylase; Glucuronidase; Peroxidase; Phenolic aglycones; Antioxidant; Nutritional functionality **39**, 1785

Soybeans; Thermostable α-galactosidase; *Bacillus stearothermophilus*; Soymilk hydrolysis; Oligo-saccharides; Flatulence **39**, 1723

Soymilk hydrolysis; Thermostable α-galactosidase; *Bacillus stearothermophilus*; Soybeans; Oligo-saccharides; Flatulence **39**, 1723

Specific organic loading rate; Biological nutrient removal; Sequencing batch reactor **39**, 507

Spent brewer's yeast cell; Biotransformation; *S*-Adenosyl-L-methionine (AdoMet); L-Methionine; γ-L-Glutamyl-L-cysteinyl-glycine (GSH) **39**, 1993

Spontaneously hypertensive rats; Fish scale; Angiotensin I converting enzyme inhibitory peptides; Antihypertensive activity; Hydrolysate purification **39**, 1195

Spray drying; Fermentation; *Beijerinckia*; Encapsulation **39**, 1201

Spray-drying; Fermentation; *Beijerinckia*; Encapsulation **39**, 1275

Sports; Antimicrobials; Antioxidants; Mung bean (*Vigna radiata*); PPP (pentose phosphate pathway); Elicitors; FPH (fish protein hydrosylates); Lactoferrin; Oregano extract; G6PDH (glucose-6-phosphate dehydrogenase), GPX cguaiacol peroxidase; phytochenucals; peptides; phenolics; antioxidants; Helicobacter phlori **39**, 637

SSF; SE-poplar wood; Detoxification methods; SHF; Ethanol **39**, 1533

Stabilisation; Pancreas; Carboxypeptidase; Sucrose; Proteases **39**, 615

Stability; Acid phosphatase; Immobilization; Composite beads; Chitosan; Activated clay; Catalytic kinetics **39**, 1087

Stability; Airlift bioreactor; Characterisation; Laccase; Phenol Red; *Trametes versicolor* **39**, 467

Stability; Immobilisation; PET-PANI composite; Horseradish peroxidase; Reuse; Kinetic parameters **39**, 883

Stability; Polyaniline; Horseradish peroxidase; Immobilisation; Kinetic parameters **39**, 957

Stability; *Trichoderma harzianum*; β-1,3-Glucanase; Inhibition; Deactivation; Kinetics **39**, 149

Stabilization; Butyrylcholinesterase; Purification; Parathion; Paraoxon **39**, 877

Starch bioconversion; Fermentation; Flux analysis; Metabolic modeling; *Saccharomyces cerevisiae*; Stressed cells **39**, 2097

Starch bioconversion; Recombinant yeast; *Saccharomyces cerevisiae*; Compartment model; Characteristic time constant **39**, 1237

Starch hydrolysis; *Aspergillus*; *Bacillus*; α-Amylase; Glucoamylase; Solid state fermentation; Thermostable **39**, 185

Starch hydrolysis; Malt; Milling; Mashing; Wort; Brewing **39**, 2213

Starch; α-Amylase; Production; *Bacillus subtilis*; Hydrolysis **39**, 1745

Stationary phase; *Lactococcus lactis* ssp. *diacetylactis*; Cold shock response; Cold shock proteins **39**, 2233

Steam exploded wheat straw (SEWS); Adsorption; Cr(VI); Fe(III)-modified SEWS; Desorption **39**, 541

Steeping; Maize; Malting; Enzyme development; Polyphenols/tannins **39**, 1013

Steeping; Sorghum; Germination; Moisture; Carboxypeptidase; Proteinase **39**, 711

Stillage grain; Ganoderma lucidum; Solid-state fermentation; Reutilization **39**, 21

Stirred batch bioreactor; Corn starch hydrolysis; α-Amylase inactivation; Process variables; Mathematical modelling **39**, 1877

Stirred batch bioreactor; Corn, rice and wheat starch hydrolysis; α-Amylase; Inactivation; Temperature; Processing time; Mathematical modelling **39**, 1137

Stirred bio-reactor; Palm oil; Hydrolysis rate; Lipase; Operating variables **39**, 13

Stirred tank reactor; Xylitol; Sugarcane bagasse hydrolysate; Immobilized cells; Ca-alginate beads **39**, 2135

Storage; Probiotic bacteria; Freeze-drying; Protection; Trehalose; Moisture **39**, 1081

Streptococcal films; Mutan hydrolysis; Mutanase; Dextranase; Synergistic effects; Digestion products **39**, 1481

Streptomyces coelicolor; Antibiotic; Response surface methodology; Optimization **39**, 1057

Streptomyces lividans; Transglutaminase; Cloning; Expression; *Streptoverticillium ladakanum* **39**, 591

Streptomyces marinensis NUV-5; Neomycin; Continuous fermentation; Airlift reactor **39**, 1407

Streptomyces marinensis; Solid state fermentation; Wheat rawa; Neomycin **39**, 529

Streptomyces rimosus; Biosorption; Iron; Waste-water treatment; Batch processing **39**, 1643

Streptomyces; Continuous process; Morphology; Antibiotic; Retamycin **39**, 2249

Streptoverticillium ladakanum; Transglutaminase; Cloning; Expression; *Streptomyces lividans* **39**, 591

Stress metabolism; Immobilisation; Elicitation; Chitosan; Pectin; *Cruciata glabra*; *Vitis vinifera* **39**, 1369

Stressed cells; Starch bioconversion; Fermentation; Flux analysis; Metabolic modeling; *Saccharomyces cerevisiae* **39**, 2097

Structured modeling; *Escherichia coli*; Compartment; *Taq I*; Induced expression; T7 phage promoter **39**, 315

Submerge; Xylanase; *Pleurotus ostreatus*; SYJ042; Cultural conditions; Properties **39**, 1561

Submerged culture; *Cordyceps pruinosa*; Polysaccharide; Orthogonal layout **39**, 2241

Submerged fermentation; Acidic lipase; *Aspergillus niger* mutants **39**, 2031

Submerged fermentation; *Antrodia camphorata*; Exopolysaccharide; Two-stage pH process; Molecular weight; pH **39**, 931

Submerged fermentation; Solid state fermentation; Organic solid waste treatment; Hybrid system; Biodegradation **39**, 37

Submerged fermentation; *Verticillium lecanii*; Solid state fermentation; Chitin; Chitinases; *N*-Acetylglucosamine; Shrimp wastes; Entomopathogenic fungi **39**, 665

Submerged membrane bioreactor; Hospital wastewater; Treatment **39**, 1427

Submerged membrane bioreactor; Whey treatment; Non-biodegradable compounds; Biomass viability **39**, 1631

Substrate inhibition; Nitrification; Kinetic parameters; Suspended and immobilised biomasses; Wastewater treatment **39**, 1159

Substrate interaction; Benzene; Toluene; Phenol; Biodegradation; *Pseudomonas putida* F1 **39**, 27

Substrate specificity; Polyphosphate; Exopolyphosphatase; Phosphate overplus; Cytosol; Culture conditions; *Saccharomyces cerevisiae* **39**, 1625

Sucrose; Hydrolysis; Invertase; Multiple steady states; CSTR; Reactor **39**, 2179

Sucrose; Pancreas; Carboxypeptidase; Stabilisation; Proteases **39**, 615

Sugar cane bagasse; Aeration; Solid-state fermentation; *Thermoascus aurantiacus*; Xylanase **39**, 1387

Sugarcane bagasse hydrolysate; Xylitol; Immobilized cells; Ca-alginate beads; Stirred tank reactor **39**, 2135

Sulphate reduction; Gas-lift reactor; Hydrogen; Sludge retention time; Methanogenesis; Homoacetogenesis **39**, 491

Sulphur oxidation; *Thiobacillus thiooxidans*; Dose–response curve; Metal toxicity; Probit model **39**, 735

Sulphur; Denitrification; Fluidized bed reactor; Nitrous oxide; Loading rate **39**, 1591

Sulphuric acid; Response surface methodology; *Thiobacillus thiooxidans*; Central composite design **39**, 1953

Supramolecular interaction; α-Chymotrypsin; Cyclodextrin; Modified enzyme; Enzyme thermostability **39**, 535

Surface modification; Radiation grafting; *O*-butyrylchitosan; Poly(vinyl chloride); Blood compatibility; Platelet adhesion **39**, 1151

Surface response methodology; Endochitinase; *Trichoderma harzianum*; *Escherichia coli* **39**, 2173

Surfactant; *Candida rugosa*; Lipase; Enzyme activity; Hydrolytic reaction; Organic–aqueous two-phase **39**, 233

Surfactants; Lipase; Enzyme production; Fatty acids; Triglycerides; Carbon source **39**, 2109

Suspended and immobilised biomasses; Nitrification; Kinetic parameters; Substrate inhibition; Wastewater treatment **39**, 1159

Suspension polymerisation; Polymer microbeads; Immobilisation; Tyrosinase; Enzyme reactor **39**, 2007

Suspended sludge; Alkalinity; Anaerobic bio-methanization; Granular sludge; Kitchen waste; Waste/inoculum ratio **39**, 2019

Sweet potato; Chitosan; Fungal mycelia; Solid substrate fermentation; Urea **39**, 1639

SYJ042; Xylanase; *Pleurotus ostreatus*; Submerge; Cultural conditions; Properties **39**, 1561

Synergistic effects; Mutan hydrolysis; Mutanase; Dextranase; Digestion products; Streptococcal films **39**, 1481

Synthetic medium; *Dictyostelium discoideum*; Axenic media; Bioreactor; Batch cultivation; Fed-batch cultivation **39**, 585

Synthetic medium; *Dictyostelium discoideum*; Axenic media; Medium design; Batch cultivation; Shake-flask cultivation **39**, 925

Synthetic medium; *Dictyostelium discoideum*; Mass cultivation; Immobilization; Pumice; Ceramic carrier **39**, 1859

T7 phage promoter; *Escherichia coli*; Structured modeling; Compartment; *Taq I*; Induced expression **39**, 315

Table olive wastewater; *Aspergillus niger*; Biological treatment; Phenolic compounds; Fenton's reagent; Hydrogen peroxide **39**, 1653

Taguchi method; *Candida* sp; Optimization; Xylitol production **39**, 951

Taq I; *Escherichia coli*; Structured modeling; Compartment; Induced expression; T7 phage promoter **39**, 315

Taxus chinensis; Paclitaxel; Elicitor; Precursor; Response–surface methodology; Nutrient feeding **39**, 1073

Temperature; Corn, rice and wheat starch hydrolysis; α-Amylase; Inactivation; Processing time; Mathematical modelling; Stirred batch bioreactor **39**, 1137

Temperature; D-Xylose; Fermentation; *Pachysolen tannophilus*; Ethanol; Xylitol **39**, 673

Temperature; Fruit and vegetable waste; Anaerobic digestion; Energy balance **39**, 2143

Terpene; Activity; Biotransformation; Fungi; Oxygen uptake rate; Process-monitoring; monitoring **39**, 2221

Textile dyes; *Irpex lacteus*; Lignin modifying enzymes (LMEs); White-rot fungi **39**, 1475

Theobroma cacao; Cacao bean husk; Glucosyltransferase; Anticaries; Polyphenols **39**, 2043

Theoretical and experimental quantum yield; *Rhodobacter capsulatus*; Anoxygenic phototrophic bacteria; Metabolism; Bioenergetic; Photosynthesis; Culture growth; Mathematical model **39**, 939

Thermal stability; Competitive binding; RSM plots; Alcohol binding; Esterification behaviour; Lipase; Acid binding; Plackett–Burman design; Selection of alcohol or acid **39**, 847

Thermoascus aurantiacus; Aeration; Solid-state fermentation; Sugar cane bagasse; Xylanase **39**, 1387

Thermodynamic parameters; Adsorption; Copper(II); Dehydrated wheat bran (DWB); Isotherm **39**, 2183

Thermodynamics; Aqueous two-phase systems; Excess Gibbs energy; Biomolecules **39**, 2075

Thermophiles; Thermophilic aerobic digestion (TAD); Amylase; Cellulase; Waste processing **39**, 1661

Thermophilic aerobic digestion (TAD); Amylase; Cellulase; Thermophiles; Waste processing **39**, 1661

Thermophilic composting; Manure; Quinone profile; Microbial succession; Community structure; Physico-chemical properties **39**, 1999

Thermostable β-amylase; *Clostridium thermosulfurogenes*; Response surface methodology; Solid-state fermentation **39**, 267

Thermostable α-galactosidase; *Bacillus stearothermophilus*; Soybeans; Soymilk hydrolysis; Oligo-saccharides; Flatulence **39**, 1723

Thermostable; *Aspergillus*; *Bacillus*; α-Amylase; Glucoamylase; Solid state fermentation; Starch hydrolysis **39**, 185

Thiamine requirements; Pyruvic acid production; *Yarrowia lipolytica*; Mechanism of pyruvic acid production **39**, 1469

Thiobacillus thiooxidans; Dose–response curve; Metal toxicity; Probit model; Sulphur oxidation **39**, 735

Thiobacillus thiooxidans; Response surface methodology; Sulphuric acid; Central composite design **39**, 1953

Thiobacillus thioparus; H_2S; Biofiltration; Peat; Hydrogen sulphide **39**, 165

Three-dimensional $K'_mV'I$ and two-dimensional K'_mV coordinate systems; Enzymes; Intensity of inhibition; Geometric portrait of inhibition; Total effect of enzymes inhibition **39**, 825

TiO_2; *Escherichia coli*; *Lactobacillus helveticus*; Photocatalytic inactivation; UV; ZnO **39**, 475

Toluene; Benzene; Biodegradation; Interaction; Phenol; *Pseudomonas putida* F1 **39**, 983

Toluene; Benzene; Phenol; Biodegradation; Substrate interaction; *Pseudomonas putida* F1 **39**, 27

Total effect of enzymes inhibition; Enzymes; Three-dimensional $K'_mV'I$ and two-dimensional K'_mV coordinate systems; Intensity of inhibition; Geometric portrait of inhibition **39**, 825

Toxic waste; Moving bed biofilm reactor; Phenolic wastes; Shock load; Phenol biodegradability; Inhibition **39**, 1177

Toxicity; Mono-azo dye; *Chlorella vulgaris*; Treatment; Acclimation **39**, 623

Trametes versicolor; Airlift bioreactor; Characterisation; Laccase; Phenol Red; Stability **39**, 467

Transformation; *Chlamydomonas reinhardtii*; Mutant *CW-15* without a cell wall; Gene *hpt* – hygromycin phosphotransferase; Electroporation **39**, 1685

Transfructosylation; *Aspergillus oryzae*; *Aureobasidium pullulans*; Fructosyl transferase; Fructo-oligosaccharides **39**, 753

Transglutaminase; Cloning; Expression; *Streptoverticillium ladakanum*; *Streptomyces lividans* **39**, 591

Treatment; Eucalyptus hydrolysate; *Candida guilliermondii*; Fermentation and xylitol production **39**, 1909

Treatment; Mono-azo dye; *Chlorella vulgaris*; Toxicity; Acclimation **39**, 623

Treatment; Submerged membrane bioreactor; Hospital wastewater **39**, 1427

Trehalose; Probiotic bacteria; Freeze-drying; Protection; Storage; Moisture **39**, 1081

Trichoderma harzianum; β-1,3-Glucanase; Stability; Inhibition; Deactivation; Kinetics **39**, 149

Trichoderma harzianum; Chitinase; Solid-state fermentation; Antifungal activity **39**, 1583

Trichoderma harzianum; Endochitinase; Surface response methodology; *Escherichia coli* **39**, 2173

Trichoderma reesei; pH; Xylanase; Cellulase; Lactose; Filamentous fungi **39**, 729

Trichoderma; D-Aminoacylase; Hydrolysis; Acylated amino acids; D-Amino acids; Constitutive enzyme **39**, 1119

Trickle-bed air biofilter; Biofiltration; Isopropyl alcohol; Acetone; Influent carbon loading; Elimination capacity **39**, 415

Trickle-bed air biofilter; Modeling; Biofiltration; Isopropyl alcohol; Acetone; Sensitivity analysis; Performance equation **39**, 1849

Tricyclazole; *Fonsecaea pedrosoi*; Melanin; Nitrogen source; Fungal mass; Chromoblastomycosis **39**, 633

Triglycerides; Lipase; Enzyme production; Surfactants; Fatty acids; Carbon source **39**, 2109

Trypsin inhibitor; Forced convection drying; Microwave assisted drying; Soybean; Unsaturated fatty acids **39**, 483

Two-phase olive mill effluents (TPOME); Inhibition; Kinetics; Anaerobic digestion; Phenolic compounds **39**, 425

Two-stage pH process; *Antrodia camphorata*; Exopolysaccharide; Submerged fermentation; Molecular weight; pH **39**, 931

Tyrosinase; Suspension polymerisation; Polymer microbeads; Immobilisation; Enzyme reactor **39**, 2007

UASB; Calcium hardness; Granular sludge; CO_2-stripper **39**, 1393

UASB; Granulation; Pentachlorophenol; Granule; Reductive dechlorination; Acclimation **39**, 1249

UASB; Olive mill wastewater; Anaerobic treatment; OLR; Polyphenol **39**, 1947

UASB; Sequential (anaerobic/aerobic) treatment; Distillery wastewater; Whisky **39**, 279

Ultrasound; MBR; Excess sludge; Biological treatment; Phosphorus removal **39**, 1923

Unsaturated fatty acids; Forced convection drying; Microwave assisted drying; Soybean; Trypsin inhibitor **39**, 483

Upflow; Backwashing; Biofilter; BOD removal; Floating media; Nitrification; Volumetric loading **39**, 765

Urea; Chitosan; Fungal mycelia; Solid substrate fermentation; Sweet potato **39**, 1639

Urokinase; Alternating current; Field intensity; Fibrin plate; Glomerulo nephritis; Voltage **39**, 1

UV; *Escherichia coli*; *Lactobacillus helveticus*; Photocatalytic inactivation; TiO_2; ZnO **39**, 475

UV-spectra; Gamma-irradiation; RNase *Th*; Amino acid composition **39**, 2257

Vegetable oil; Remediation; Process; Extractant; Polycyclic aromatic hydrocarbons **39**, 1211

Vegetable oil; Residual inert COD; Physicochemical treatment; Dissolved air floatation; Oil and grease **39**, 869

Vermicompost; Heavy metals; Cd(II), Cu(II), Pb(II) and Zn(II) ions; Effluent treatment **39**, 81

Vertical circle; Integrated oxidation ditch; Wastewater treatment **39**, 1111

Verticillium lecanii; Submerged fermentation; Solid state fermentation; Chitin; Chitinases; *N*-Acetylglucosamine; Shrimp wastes; Entomopathogenic fungi **39**, 665

VFA; *Poly(hydroxyalkanoates); Acidification; Fermentation* **39**, 295

Viable *R. arrhizus*; Bioaccumulation; Cd (II); Pb (II); Cu (II) **39**, 105

Vibrio parahaemolyticus; Solid-state bioprocessing; Antimicrobial activity; *Listeria monocytogenes*; *Escherichia coli 0157:H7*; *Rhizopus oligosporus* **39**, 1939

Vicia faba; Heat shock; Microwave treatment; Antioxidant activity; L-DOPA; Parkinson's diet **39**, 1775

Virus-like particle; Infectious bursal disease virus; Insect larvae; Immobilized metal-ion affinity chromatography **39**, 571

Viscose; Lyocell; Cellulose; Cellulase; Kinetics; Adsorption **39**, 257

Vitis vinifera; Immobilisation; Elicitation; Chitosan; Pectin; Stress metabolism; *Cruciata glabra* **39**, 1369

Volatile compounds; Cassava; Aroma; Liquid waste; Geotrichum fragrans **39**, 411

Volatile fatty acids; Anaerobic; Hybrid; pH **39**, 1491

Voltage; Alternating current; Field intensity; Fibrin plate; Glomerulo nephritis; Urokinase **39**, 1

Volumetric loading; Backwashing; Biofilter; BOD removal; Floating media; Nitrification; Upflow **39**, 765

Waste processing; Thermophilic aerobic digestion (TAD); Amylase; Cellulase; Thermophiles **39**, 1661

Waste/inoculum ratio; Anaerobic bio-methanization; Granular sludge; Suspended sludge; Kitchen waste; Alkalinity **39**, 2019

Wastewater disinfection; Chlorination; Electrochemical; Free radical; Ozonation; Scanning electron microscopy (SEM) **39**, 1421

Wastewater treatment; Adsorption; Ammoniacal-nitrogen; Leachate; Nitrification; Reed bed **39**, 1971

Waste-water treatment; Biosorption; Iron; *Streptomyces rimosus*; Batch processing **39**, 1643

Wastewater treatment; Integrated oxidation ditch; Vertical circle **39**, 1111

Wastewater treatment; Membrane bioreactor; Membrane filtration; Membrane fouling; Hydrodynamics; Critical flux **39**, 157

Wastewater treatment; Microbial fuel cell (MFC); Membrane-less; Mediator-less; Pt-coated graphite felt; Aeration **39**, 1007

Wastewater treatment; Nitrification; Kinetic parameters; Substrate inhibition; Suspended and immobilised biomasses **39**, 1159

Wastewater; Constructed wetland; Recirculation; Aeration; Nitrification **39**, 351

Wastewater; Mesophilic anaerobic digestion; Fluidised-bed reactor; Protein isolates; Chickpea flour **39**, 1913

Wastewater; Modified rice husk; Metal; Sorption **39**, 437

Wastewater; *Phanerochaete chrysosporium*; Chlorophenols; Adsorption; Desorption **39**, 2025

Water activity; *Aspergillus niger*; Invertase; Overproduction; Parasexual cycle; Solid fermentation; Enzymatic yields **39**, 2085

Water extractable TOC; Food waste composting; Fed-batch operation; Moisture content; Composting rate **39**, 1183

Water sorption; Angiotensin I converting enzyme; Flavourzyme; Corn gluten; Solubility **39**, 989

Wheat rawa; Cephalosporin C; *Acremonium chrysogenum* ATCC 48272; Solid state fermentation; Optimization **39**, 171

Wheat rawa; Solid state fermentation; Neomycin; *Streptomyces marinensis* **39**, 529

Whey hydrolysis; Fluidized bed reactor; β-Galactosidase; *Kluyveromyces fragilis*; Lactose hydrolysis; Lactoyzm™; Low lactose milk **39**, 325

Whey proteins; Size-exclusion chromatography; Aqueous two-phase systems; Modeling **39**, 1751

Whey treatment; Submerged membrane bioreactor; Non-biodegradable compounds; Biomass viability **39**, 1631

Whey; Chitosan; Lactose; Biochemical oxygen demand (BOD); Demineralization **39**, 381

Whisky; Sequential (anaerobic/aerobic) treatment; Distillery wastewater; UASB **39**, 279

White-rot fungi; *Irpex lacteus*; Lignin modifying enzymes (LMEs); Textile dyes **39**, 1475

White-rot fungi; Laccase; Nutritional factors; Inducers; Decolorization **39**, 1415

Wine making; Glycerol; Immobilized yeast cells; Delignified cellulosic material; Gluten pellets **39**, 499

Wine; Continuous fermentation; Quince; Immobilized cells; Yeast **39**, 143

Wine; Glycerol production; *Saccharomyces cerevisiae*; Fermentation; Osmophilic yeast; Growth kinetics **39**, 1285

Wood chips; Immobilization; *Acetobacter aceti*; Acetic acid fermentation; Siran; Polyurethane foam **39**, 547

Wort; Malt; Milling; Mashing; Starch hydrolysis; Brewing **39**, 2213

X. campestris; Xanthan gum; Biomass; Molasses; Fermentation **39**, 249

Xanthan gum; Biomass; Molasses; *X. campestris*; Fermentation **39**, 249

Xylanase; Aeration; Solid-state fermentation; Sugar cane bagasse; *Thermoascus aurantiacus* **39**, 1387

Xylanase; pH; Cellulase; Lactose; *Trichoderma reesei*; Filamentous fungi **39**, 729

Xylanase; *Pleurotus ostreatus*; SYJ042; Submerge; Cultural conditions; Properties **39**, 1561

Xylitol production; *Candida* sp; Optimization; Taguchi method **39**, 951

Xylitol; D-Xylose; Fermentation; *Pachysolen tannophilus*; Temperature; Ethanol **39**, 673

Xylitol; Sugarcane bagasse hydrolysate; Immobilized cells; Ca-alginate beads; Stirred tank reactor **39**, 2135

Xylobiase; β-Xylosidase; Glycoprotein; *Aspergillus versicolor* **39**, 1931

β-Xylosidase; Xylobiase; Glycoprotein; *Aspergillus versicolor* **39**, 1931

Yarrowia lipolytica; Beef tallow; Biomass support particle (BSP); Lipase; Poultry fat; *Rhizomucor miehei* **39**, 1347

Yarrowia lipolytica; Pyruvic acid production; Thiamine requirements; Mechanism of pyruvic acid production **39**, 1469

Yeast; Decolorization; Molasses wastewater; Melanoidin; *Citeromyces* sp **39**, 917

Yeast; *Kluyveromyces lactis*; Disruption; β-Galactosidase; Immobilization; Gelatin **39**, 703

Yeast; Wine; Continuous fermentation; Quince; Immobilized cells **39**, 143

Zeolite; Carrier; Activated carbon; Activated sludge; Nitrification; C/N ratio; Adsorption capacity **39**, 211

ZnO; *Escherichia coli*; *Lactobacillus helveticus*; Photocatalytic inactivation; TiO_2; UV **39**, 475
